- <sup>1</sup> Professional Phase coursework.
- <sup>2</sup> For field experiences, residential practicum and advanced practicum that require candidates to be placed within a school or agency setting, the college requires candidates to complete the Bureau of Criminal Investigation and Identification (BCII) and the Federal Bureau of Investigation (FBI) background checks and submit the results to authorized personnel at their assigned school/agency before the beginning of the field experience or the first day of the semester in which the field experience or practicum will take place. Authorized school/agency personnel will determine whether a candidate may participate in fieldwork in that setting. The BCII and FBI background checks are good for one year and are mandatory for licensure application. Electronic fingerprinting is available for BCII and FBI in 221 White Hall and should be completed at least two months prior to field experience residential practicum/advanced practicum. Regional campus students should contact their Regional Campus coordinator to identify fingerprinting availability at each campus. Candidates are responsible for fees incurred for this requirement. For more information on this policy, contact the Director of Clinical Field Experience in 304 White Hall. Visit the Ohio Department of Education (ODE) website at <http://ode.state.oh.us> for more information about background check requirements in Ohio. Contact the Office of Professional Conduct at the ODE for specific information about the results of the background check. Due to the length of time that a student participates in the variety of work experiences within the ASL/English Interpreting program, the student may need to complete a minimum of two background checks. Also, if a student is placed out of state, s/he may need to get a background check completed in that respective state according to the requirements of that state.

upper-division curriculum, including a senior-level practicum, which provides students with professional training in the field of interpreting.

Before students are approved for ASEI 43192, they must do the following:

- Complete all coursework, with the exception of ASEI 43192 and ASEI 49625
  - Possess a 2.750 overall GPA and a 3.000 major GPA
  - Complete the prescribed number of clinical application hours
  - Pass the Sign Language Proficiency Interview (SLPI) at the intermediate level or receive a minimum level 2 on the American Sign Language Proficiency Interview (ASLPI) before October 31 of the semester prior to practicum. The SLPI must be taken at the Ohio School for the Deaf.
- <sup>1</sup> Undergraduate students who have not completed a minimum of 12 Kent State University credit hours will be evaluated for advanced study and professional phase based on their high school GPA for new freshmen or transfer GPA for transfer students.

## Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
3.000	2.750

## Progression Requirements

- To be able to continue in the program, students must be accepted to the professional phase, comprised of ASEI 43103, ASEI 43105, ASEI 43107, ASEI 43110, ASEI 43111, ASEI 43112, ASEI 43192, ASEI 49625, SPED 43092 and SPED 43310. Typically, students must apply for the professional phase by the end of the second week of the fourth semester. To be eligible for the professional phase, students must have the following:
  - Minimum 3.000 major GPA<sup>1</sup>
  - Minimum 2.750 overall GPA<sup>1</sup>
  - Minimum C grade in ASEI 43102, ASL 19201, ASL 19202, ENG 11011 and ENG 21011 (or their equivalents)
  - Minimum B- grade in ASEI 43100
  - Passing score on the portfolio interview after ASL 29202 (students who are placed directly into an advanced ASL course are not required to complete the portfolio interview)

Students who are not able to advance into the professional phase or are not able to pass the proficiency exam will receive a warning and will be required to meet with their faculty and professional advisors to develop a plan of continuation. The plan will include all actions necessary to continue in current program, the opportunity to declare a different program, a timeline of when actions should occur and next steps if actions are not followed. Students who have received a warning the previous term will be reviewed during end-of-term processing to determine their status regarding continuation in the major.

The purpose of the professional phase is to ensure that students in the major have adequate preparation necessary to successfully complete

Students in HDFS receive the knowledge and skills needed to help individuals and families across the lifespan to flourish in a global society. The degree prepares students for a wide range of careers in diverse settings including family and community-based social services, prevention, nonprofit administration, and family and community intervention. Core coursework focuses on development across the lifespan and understanding family relationships, the environments in which individuals live and learn, and the unique strengths and needs of diverse individuals and families. After completing the degree, you will not only make a living, you will make a difference in the world around you.

The Human Development and Family Studies major comprises the following concentrations:

- The **Case Management for Individuals and Families** concentration provides training in needs assessment and the utilization of available public and private resources. Case managers provide assistance to individuals and families by coordinating services and access to resources. Students in this concentration will learn the skills necessary to understand clients' needs and goals, and develop a plan to achieve these goals with the resources and services available to them. Graduates are eligible for securing positions in a wide array of social service agencies.
- The **Child and Youth Development** concentration prepares students for working with children and adolescents in non-school settings such as residential treatment, group care, community youth services, foster care and after-school programs. Graduates are able to design and deliver developmentally appropriate programs, preparing children and youth for productive adulthood by emphasizing skills and competency development.
- The **Family Life Education** concentration prepares graduates to develop and implement educational programming for parents, couples, and families in a variety of education and human service settings. Family life educators teach individuals and families effective communication skills, positive self-esteem, parenting skills and healthy interpersonal skills. Graduates are eligible to apply to be certified family life educators (CFLE), a credential granted by the National Council on Family Relations.
- The **Gerontology** concentration prepares graduates for professional positions in the diverse field of aging, including health and wellness, community-based social services, retirement communities, adult-care centers and nursing homes. The curriculum provides students with a solid understanding of typical age-related changes and how these changes affect a person physiologically, psychologically and socially. According to the U.S. Census, 20 percent of the total population will

be 65 or older by 2030. Because of the increasing number of older persons and the fact that people are generally living longer, there is a growing need for people to work in the field of aging.

- The **Human Services** concentration is a completer program for students who hold an associate degree in human services. This program prepares graduates for entry-level positions in a variety of human service agencies, including child and family welfare agencies, mental health centers, developmental disability facilities and substance abuse treatment centers.

## Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

**Freshman Students on the Kent Campus:** The freshman admission policy on the Kent Campus is selective. Admission decisions are based upon the following: cumulative grade point average, ACT and/or SAT scores, strength of high school college preparatory curriculum and grade trends. The Admissions Office at the Kent Campus may defer the admission of students who do not meet admissions criteria but who demonstrate areas of promise for successful college study. Deferred applicants may begin their college coursework at one of seven regional campuses of Kent State University. For more information on admissions, including additional requirements for some academic programs, visit the admissions website for new freshmen.

The Master of Education degree in School Psychology provides a focus on the core principles of school psychological practice. The M.Ed. degree is not considered a terminal degree and is not sufficient for earning the Ohio state license in school psychology.

Additional training beyond the M.Ed. (e.g., an Ed.S. or Ph.D.) is required in order to gain the credential of 'school psychologist' at the state and national levels (i.e., through both the Ohio Department of Education and NASP's national certification program) for licensure and practice in most states.

## Description

The Ph.D. degree in School Psychology is committed to a scientist-practitioner model of training, which conceptualizes school psychologists as data-oriented problems solvers and transmitters of psychological knowledge and skill. As such, students draw upon the scientific literature as a primary basis for professional practice and focus their research agendas so as to have meaningful implications for practice. In addition, functioning as a scientist-practitioner means that professional practice is conducted in ways that are consistent with the scientific method.

Emphasis in training is placed on the provision of services through research-based practice and data-based decision making. Doctoral students gain competencies, not only in the provision of school psychological services to individual children and youth, but also in the promotion and implementation of systemic, preventative educational and mental health systems. Since the program's emphasis is on the application of psychology in applied educational and mental health settings, students are required to demonstrate competence in the substantive content areas of psychological and educational theory; the scientific, methodological and theoretical foundations of practice in school psychology; data-based decision making; intervention design and evaluation; and cultural and individual diversity.

The school psychology doctorate prepares students to work as leaders in applied practice in educational and mental health settings.

## Graduation Requirements

- The total number of required credit hours in each student's Plan of Study/Residency Plan will vary based on previous graduate coursework, point of entry into the program, program area advisor input and the school psychology program requirements. The minimum requirement for a doctoral degree is 60 credit hours beyond the master's degree. Given the requirements of the accreditation bodies governing Kent State's school psychology degree program, the typical number of required credit hours for the doctoral degree will exceed that of the minimum college requirements.
- Students who enter the program without recent and comprehensive training in school psychology (from a NASP-approved program) and without a school psychology license must complete relevant coursework. The total number of required hours will vary based on point of entry into the program, previous coursework and program advisor input.
- State/Federal background checks are required for all field-based experiences.

## Candidacy

Once the student has successfully completed and orally defended their comprehensive exams, they are recommended for doctoral candidacy in line with all other program and college requirements.

## Licensure Information

Candidates seeking School Psychologist licensure are required to pass the ETS Praxis II School Psychologist test or the domain specific School Psychology Ohio Assessment for Educators test.

## Description

A Bachelor of Science in Education degree in Special Education prepares students to become special education teachers (sometimes also referred to as Intervention Specialists), although some graduates may work with individuals with disabilities in non-school settings.

Special educators teach individuals with many kinds of disabilities including learning disabilities, emotional and behavioral disorders, ADHD/ other health impairments, intellectual disabilities, autism spectrum disorder, hearing impairments, and multiple disabilities.

Special educators may co-teach with general education teachers in academic classrooms, teach small groups of students in a resource room, or teach students individually in highly specialized classrooms or programs designed specifically to meet the needs of students with disabilities. Special education majors who do not want to become teachers will often work with adults with disabilities in residential and/or vocational programs.

The Special Education major comprises the following concentrations:

- The **Deaf Education** concentration prepares candidates to work with deaf and hard-of-hearing students across inclusion, itinerant, resource room and self-contained public and residential classroom settings. Extensive field and teaching lab experiences optimize this preparation in combination with coursework in literacy, mathematics, science and social studies that help prepare students to take specific assessments to become designated as a 'highly qualified' teacher in deaf education, reading and mathematics. Instructional methods are comprehensive in nature and provide the unique strategies necessary to address issues concomitant with hearing loss, including language development in both English and American Sign Language, use of bilingual-bicultural methodologies and various assistive and instructional technologies. The hierarchical coursework sequence concludes with thematic unit instruction that prepares graduates to work with the Core Curriculum to address all academic content areas, as well as transition, and students with additional needs. Graduates are eligible to apply for Ohio licensure to teach preK-12 deaf and hard-of-hearing students.
- The **Mild to Intensive Dual License** concentration prepares candidates to work with individuals (kindergarten through age 21) who have a wide variety of support needs in a broad array of settings (e.g., general education classrooms, self-contained classrooms, alternative schools and community-based programs). Candidates in this concentration progress through highly-structured coursework and extensive field experiences to learn evidence-based practices to teach academic, social adaptive and life-skills. Successful completion of this program enables candidates to be eligible for licensure in both Mild/Moderate Educational Needs (e.g., learning disabilities emotional and behavioral disorders, ADHD) as well as Moderate/Intensive Educational Needs (e.g., intellectual disabilities, autism spectrum disorders, physical disabilities) through the State of Ohio.

## Admission Requirements

Admission to this major is selective. To be admitted directly into the Special Education major, freshmen must have a minimum 2.750 high school GPA, and transfer students must have a minimum 2.750 overall GPA in all previous undergraduate coursework. Students who do not meet the GPA requirement at the time of admission for this major will be admitted to the EHHS General non-degree program until which time they have established a Kent State GPA of 2.750. They may then submit a change of program to declare this major.

**Current Kent State and Transfer Students:** Active Kent State students who wish to change their major must have attempted a minimum 12 credit hours at Kent State and meet all admission criteria listed above to be admitted. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

**English Language Proficiency Requirements for International Students:**

All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information on international admission, visit the Office of Global Education's admission website.

## Program Learning Outcomes

Graduates of the program will be able to:

1. Demonstrate knowledge of: 1) learner development and individual learning differences, 2) the learning environment, 3) curricular content knowledge, 4) assessment, 5) instructional planning and evidence-based intervention strategies, and 6) professional learning and practice, and collaboration.
2. Demonstrate the dispositions necessary to be successful special educational teachers/professionals.
3. Demonstrate preparation for the profession by successfully completing the Ohio Assessment for Educators (OAE) Special Education Assessments required for their Special Education License type.

## Licensure Information

Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged but not required.

Students must apply for State of Ohio Licensure (defined by completion of all licensure program requirements) within 12 months of program completion. After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12 month deadline may have to take additional coursework if the content, methods courses, program requirements, or licensure requirements have changed from the catalog in force.

## Progression Requirements

Admission to advanced study is required prior to enrolling in upper-division education courses. Students must meet all professional requirements for admission to advanced study and have a minimum

overall 2.750 GPA<sup>1</sup> and minimum 3.00 GPA<sup>1</sup> in the professional coursework.

To manage enrollment and deliver high-quality programs, the faculty will select the most qualified applicants for admission based upon evaluation of standardized test scores of reading, writing and mathematics; academic success (overall GPA<sup>1</sup>) at Kent State University; non-academic criteria and other specific program criteria.

Please be aware that reapplication may be necessary if postponing advanced study coursework or if withdrawn for one year or more.

<sup>1</sup> Undergraduate students who have not completed a minimum of 12 Kent State University credit hours will be evaluated for advanced study and professional phase based on their high school GPA for new freshmen or transfer GPA for transfer students.

## Description

**Admission to the ASL/English Interpreting concentration has been suspended temporarily.**

The Master of Education degree in Special Education provides students with advanced understanding of contemporary research and practice issues in special education. Students in the program are typically interested in pursuing enhanced professional competence, career advancement, leadership roles, advocacy and systems change, or preparation for doctoral-level study. Students do not need to have an undergraduate degree in special education (or education) to be successful in the master's degree, however, should be motivated to develop a deeper understanding of the field of special education.

Students in the M.Ed. Special Education major will develop advanced skills in: designing, implementing, and evaluating research-based practices that meet the special education needs of learners with disabilities; understanding the conceptual underpinnings of special education, as well as policies that guide its implementation in school and community settings; analyzing contemporary issues surrounding special education and the impact of exceptionality on individuals and their families; and understanding the roles that research plays in special education theory.

The M.Ed. degree program does not prepare students for teacher licensure; however, some of the coursework required for the degree may count toward licensure. Students interested in both licensure and a M.Ed. degree will need to apply and be fully admitted into both the master's degree and the non-degree graduate licensure preparation program.

The Special Education major comprises the following concentrations:

- The **ASL/English Interpreting** concentration - *admission to this concentration has been temporarily suspended.*
- The **Deaf Education** concentration focuses on needs of students who are deaf or hard of hearing.

- The **Early Childhood Intervention Specialist** concentration focuses on needs of young children with or at risk for developmental delays or disabilities, birth to grade 5 (birth to 10) and their families.
- The **General Special Education** concentration provides a broad focus on special education across all ages and types of student needs. Students interested in the General Special Education concentration will work with a graduate adviser to develop a personalized plan of study.
- The **Mild/Moderate Educational Needs** concentration focuses on needs of students with mild to moderate educational needs who most often participate in the general education academic curriculum with special education supports.
- The **Moderate/Intensive Educational Needs** concentration focuses on students with moderate to intensive educational needs who most often require modifications to the general academic curriculum and/or other extensive special education supports.
- The **Pre-Kindergarten Special Needs** concentration focuses on the needs of preschool children with or at risk for developmental delays or disabilities
- The **Transition to Work** concentration focuses on needs of students with disabilities transitioning to adulthood.

This program prepares students to apply for an endorsement which can be added to any Special Education Intervention Specialist license, the Early Childhood Education teaching license and/or the Pre-K validation. The endorsement provides teachers with the coursework and field experiences necessary to work effectively with preschool-aged children with disabilities in a variety of settings.

The non-degree program is not a master's degree program. Students interested in obtaining a teaching license and a master's degree from Kent State University must also be fully admitted into the master's degree program and complete the prescribed coursework on the master's degree prospectus, in addition to courses that are prescribed here for licensure.

## Description

Persons who hold an active license in Special Education, Elementary Education, or Middle Childhood Education may pursue an additional license in Early Childhood Education. This Early Childhood Education (PK-3) Additional Licensure Preparation program is approved by the state of Ohio and adds a Prek-3 license to an already existing valid Ohio license. Students must have an advising appointment with the graduate program coordinator to review former licenses, teaching experiences, employment, as well as field experiences to determine which of the courses and field experiences are necessary (to compliment an already existing valid license held by prospective student). Additionally, a program of study must be filed in the Office of Graduate Student Services, 418 White Hall, prior to application for the licensure.

The non-degree program is not a master's degree program. Students interested in obtaining a teaching license and a master's degree from Kent State University must also be fully admitted into the master's degree program and complete the prescribed coursework on the master's degree prospectus, in addition to courses that are prescribed here for licensure.

### Description

The Bachelor of Science in Education degree in Early Childhood Education focuses on professional preparation and application of current theory, methods and practices for future teachers of preschool to grade five classrooms. Students form a cohort and complete the five-block sequence of courses while gaining teaching experiences linked to coursework. All students complete field and practicum experiences in diverse settings, including urban and inclusive programs, and accumulate approximately 1,200 clock hours of field experience in preschool and elementary classrooms.

Graduates of the program who pass the State of Ohio Assessment Tests are eligible for Ohio licensure in Early Childhood, which is valid for teaching children, age three through grade five, who are typically developing, at-risk, gifted or who have mild/moderate educational needs.

Graduates also have the opportunity to receive an International Baccalaureate recognition certificate concurrent with the completion of the B.S.E. degree.

### Admission Requirements

Admission to this major is selective. As part of an enrollment management plan, students are admitted to the Early Childhood Education major on a selective basis. A maximum of 100 students will be admitted to the major each academic year. A minimum 2.750 overall high school grade point average is required. Students seeking admission to this program must meet all professional requirements for admission to advanced study and have a minimum 2.750 overall GPA in all previous undergraduate coursework. Because of the instituted enrollment management plan, meeting the above requirements does not automatically provide students admittance to the Early Childhood Education major. Faculty will select the most qualified applicants based upon the number of available student spaces, students' standardized test scores, essay, interview and overall GPA. Students should contact the Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire into the procedures associated with admission

to advanced study and selective admission to the Early Childhood Education program.

Students who do not meet the GPA requirement at the time of admission for this major will be admitted to the EHHS General non-degree program until which time they have established a Kent State GPA of 2.750. They may then submit a change of program to declare this major.

**Current Kent State and Transfer Students:** Active Kent State students who wish to change their major must have attempted a minimum 12 credit hours at Kent State and meet all admission criteria listed above to be admitted. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

**English Language Proficiency Requirements for International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information on international admission, visit the Office of Global Education's admission website.

### Program Learning Outcomes

1. Co-construct curriculum as a co-worker with learners and others (parents, families, colleagues and community members) to make sound decisions for learning and teaching experiences, as opposed to being passive receivers of prescribed curriculum.
2. Synthesize conceptual understandings of children, theory, content, technology and sociocultural contexts into meaningful activities and opportunities for learning with all preschool-to-grade five students.
3. Engage in the habit of self-assessment in order to continually uncover unknown possibilities in children's learning, classroom practice, educational theory and one's own teaching identity in the local and global context.
4. Become committed to the children and their learning, the families and the local community while having an awareness of the global context; engage in continuous self-improvement and lifelong learning.
5. Apply skills, knowledge and dispositions to challenge "questionable" policies that limit opportunities for all children.
6. Utilize research and theory to develop varied and effective pedagogies and assessments that will positively impact all students' learning (learning and teaching is a transdisciplinary practice).
7. Advocate as ethical leaders and moral agents striving for social justice,
8. Acknowledges and practices multiple, multi-ethnic, multicultural, multiracial, multi- social and -economic and multilingual perspectives in a global society.

## Progression Requirement

Students must meet all professional requirements for admission to advanced study.

To manage enrollment and deliver high-quality programs, the faculty will select the most qualified applicants for admission based upon evaluation of standardized test scores of reading, writing and mathematics; academic success (overall GPA) at Kent State University; non-academic criteria and other specific program criteria.

Please be aware that reapplication may be necessary if postponing advanced study coursework or if withdrawn for one year or more.

## Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
2.000	2.750

- A minimum grade of C grade is required in most courses; view the program requirements to see specific courses.

## Licensure Information

Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged but not required.

Students must apply for State of Ohio Licensure (defined by completion of all licensure program requirements) within 12 months of program completion. After 12 months, applicants must meet state-approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12-month deadline may have to take additional coursework if the content, methods courses, program requirements or licensure requirements have changed from the catalog in force.

## Description

The Bachelor of Science in Education degree in Earth Science prepares students for teacher licensure in earth science, grades seven to 12. Students take a broad range of courses in biology, chemistry, geography and physics and specialize in geology content. Most content coursework is completed during students' first three years; methods coursework begins during the spring of their third year. In the final year of the

program, students complete remaining content courses, science teaching methods courses and a year-long placement in a local school district, which concludes with 13 weeks of student teaching in the spring. Earth Science students are encouraged to meet with their advisor early in their program because many courses must be sequenced carefully.

## Accreditation

National Council for Accreditation of Teacher Education

## Admission Requirements

Admission to this major is selective. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program, it is required that new freshmen have a 2.750 high school GPA. Students who do not meet the GPA requirement at the time of admission for this major will be admitted to the EHHS General non-degree program until which time they have established a Kent State GPA of 2.750. They may then submit a change of program to declare this major.

**Current Kent State and Transfer Students:** Active Kent State students who wish to change their major must have attempted a minimum 12 credit hours at Kent State and meet all admission criteria listed above to be admitted. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

**English Language Proficiency Requirements for International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information on international admission, visit the Office of Global Education's admission website.

## Program Learning Outcomes

Graduates of this program will be able to:

1. Plan multiple lessons using a variety of inquiry approaches that demonstrate their knowledge and understanding of how to engage all students in learning science.
2. Plan a learning environment and learning experiences for all students that demonstrate chemical safety, safety procedures, and the ethical treatment of living organisms within their licensure area.
3. Plan fair and equitable assessment strategies to analyze student learning and to evaluate if the science learning goals are met.

## Double Majors/Dual Degrees

Students seeking to declare an additional teacher education major in the B.S.E. degree (double major) or in a different degree (dual degree) may have the double major/dual degree approved as long as the following requirements are met:

1. Approval is received from the academic unit administrating each major. A program of study for those interested in pursuing a double major must be approved in writing by faculty from each major area prior to admission to advanced study.
2. All required content courses are completed for each major
3. All required method courses are completed for each major.
4. Separate practicum and inquiry courses are completed for each major as listed below:

  - b. ADED 49525 (or the equivalent required by the major outside the college)
5. Students who have two majors from among the following only need to take one ADED 42392, consisting of a 16-week classroom experience involving both subject areas: Life Sciences, Earth Science, Physical Sciences, Integrated Science, Integrated Mathematics, Life Science/Chemistry, Integrated Social Studies and/or Integrated Language Arts.
6. Students who have a second major not included in the list above (#5) will have their student teaching requirements determined by

faculty from both program areas at the time the program of study is developed, with a minimum 16 weeks spent in the classroom.

### **Licensure information**

Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged but not required.

Students must apply for State of Ohio Licensure (defined by completion of all licensure program requirements) within 12 months of program completion. After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. Students seeking to declare an additional teacher education major in the B.S.E. degree (double major) or in a different degree (dual degree) may have the double major/dual degree approved as long as the following requirements are met:

1. Approval is received from the academic unit administrating each major. A program of study for those interested in pursuing a double major must be approved in writing by faculty from each major area prior to admission to advanced study.
2. All required content courses are completed for each major
3. All required methods courses are completed for each major.
4. Separate practicum and inquiry courses are completed for each major as listed below:

## Licensure information

Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged but not required.

Students must apply for State of Ohio Licensure (defined by completion of all licensure program requirements) within 12 months of program completion. After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12 month deadline may have to take additional coursework if the content, methods courses, program requirements, or licensure requirements have changed from the catalog in force.

## Admission Requirements

Admission to this major is selective. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program, it is required that new freshmen have a 2.750 high school GPA. Students who do not meet the GPA requirement at the time of admission for this major will be admitted to the EHHS General non-degree program until which time they have established a Kent State GPA of 2.750. They may then submit a change of program to declare this major.

**Current Kent State and Transfer Students:** Active Kent State students who wish to change their major must have attempted a minimum 12 credit hours at Kent State and meet all admission criteria listed above to be admitted. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

### English Language Proficiency Requirements for International Students:

All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information on international admission, visit the Office of Global Education's admission website.

## Licensure information

Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged but not required.

Students must apply for State of Ohio Licensure (defined by completion of all licensure program requirements) within 12 months of program completion. After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12 month deadline may have to take additional coursework if the content, methods courses, program requirements, or licensure requirements have changed from the catalog in force.

## Progression Requirements

Students must meet all professional requirements for admission to advanced study. To be admitted, students must display evidence of the following:

- Adequate communication skills
- Sound content area knowledge (language arts, mathematics, science or social studies)
- Basic understanding of the teaching profession
- Basic understanding of adolescents

Dispositions aligned with the conceptual framework of the College of Education, Health and Human Services, including being open-minded, flexible, caring and responsible.

Faculty will select the most qualified applicants based on an interview; letters of recommendation; GPA<sup>1</sup>; Praxis Core scores; and performance in English and communication studies coursework. Applicants to the Integrated Science major must have experience working with young adults in a supervisory capacity, such as tutoring, camp counseling, volunteer work or related experience. Students should contact the College of Education, Health and Human Services' Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire about the procedures and criteria associated with advanced study.

<sup>1</sup> Undergraduate students who have not completed a minimum of 12 Kent State University credit hours will be evaluated for advanced study and professional phase based on their high school GPA for new freshmen or transfer GPA for transfer students.

## Graduation Requirements

Minimum Major GPA	Minimum Overall GPA
2.600	2.750

## Double Majors/Dual Degrees

Students seeking to declare an additional teacher education major in the B.S.E. degree (double major), or in a different degree (dual degree) may have the double major/dual degree approved as long as the following requirements are met:

- Approval is received from the academic unit administrating each major. A program of study for those interested in pursuing a double major must be approved in writing by faculty from each major area prior to admission to advanced study.
- All required content courses are completed for each major.
- All required methods courses are completed for each major.
- Separate practicum and inquiry courses are completed for each major as listed below:
  - ADED 42292 (or the equivalent required by the major outside the college)
  - ADED 49525 (or the equivalent required by the major outside the college)
- Students who have two majors from among the following only need to take ADED 42392, consisting of a 16-week classroom experience involving both subject areas: Life Sciences, Earth Science, Physical Sciences, Integrated Science, Integrated Mathematics, Life Science/Chemistry, Integrated Social Studies and/or Integrated Language Arts.
- Students who have a second major not included in the list above (#5) will have their student teaching requirements determined by faculty from both program areas at the time the program of study is developed, with a minimum 16 weeks spent in the classroom.

## Licensure information

Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged but not required.

Students must apply for State of Ohio Licensure (defined by completion of all licensure program requirements) within 12 months of program completion. After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12 month deadline may have to take additional coursework if the content, methods courses, program requirements, or licensure requirements have changed from the catalog in force.

## Description

The Integrated Science Additional Licensure Preparation non-degree program prepares students to obtain an additional teacher license in all areas of sciences for grades 7-12. Completion of the coursework is a prerequisite to being recommended by Kent State University for licensure.

which is granted by the Ohio Department of Education. This non-degree program cannot be used for students seeking initial licensure.

This program is not a master's degree. Students interested in a master's degree at Kent State must be fully admitted into and complete the requirements for the master's program, in addition to courses that are prescribed for additional licensure.

### Fully Offered At:

- Kent Campus

## Accreditation

National Council for Accreditation of Teacher Education

## Admission Requirements

Applicants will be assessed holistically, considering academic credentials; standardized test scores of reading, writing and mathematics; academic or professional references; non-academic dimensions; and other specific program criteria.

- Bachelor's degree from an accredited college or university
- Minimum 3.000 overall undergraduate GPA on a 4.000 point scale
- Official transcript(s)
- Goal statement
- Two letters of recommendation
- Questions in Anticipation of Licensure Form
- Evidence of valid four-year Resident Educator or five-year Professional State of Ohio teaching licensure

For more information about graduate admission, please visit the Graduate Studies website.

## Program Learning Outcomes

Completers of this non-degree program will be able to:

1. Plan multiple lessons using a variety of inquiry approaches that demonstrate their knowledge and understanding of how to engage all students in learning science.
2. Plan a learning environment and learning experiences for all students that demonstrate chemical safety, safety procedures and the ethical treatment of living organisms within their licensure area.
3. Plan fair and equitable assessment strategies to analyze student learning and to evaluate if the science learning goals are met.

## Admission Requirements

Admission to this major is selective. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program, it is required that new freshmen have a 2.750 high school GPA. Students who do not meet the GPA requirement at the time of admission for this major will be admitted to the EHHS General non-degree program until which time they have established a Kent State GPA of 2.750. They may then submit a change of program to declare this major.

**Current Kent State and Transfer Students:** Active Kent State students who wish to change their major must have attempted a minimum 12 credit hours at Kent State and meet all admission criteria listed above to be admitted. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

**English Language Proficiency Requirements for International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information on international admission, visit the Office of Global Education's admission website.

Applicants to the Integrated Social Studies major must have experience working with young adults in a supervisory capacity, such as tutoring, camp counseling, volunteer work or related experience. ## Graduation Requirements

Minimum Major GPA	Minimum Overall GPA

- A minimum C grade may be required in some courses.

## Double Majors/Dual Degrees

Students seeking to declare an additional teacher education major in the B.S.E. degree (double major), or in a different degree (dual degree) may have the double major/dual degree approved as long as the following requirements are met:

1. Approval is received from the academic unit administrating each major. A program of study for those interested in pursuing a double major must be approved in writing by faculty from each major area prior to admission to advanced study.
2. All required content courses are completed for each major
3. All required methods courses are completed for each major.
4. Separate practicum and inquiry courses are completed for each major as listed below:
  - a. ADED 42292 (or the equivalent required by the major outside the college)
  - b. ADED 49525 (or the equivalent required by the major outside the college)
5. Students who have two majors from among the following only need to take ADED 42392, consisting of a 16-week classroom experience involving both subject areas: Life Sciences, Earth Science, Physical Sciences, Integrated Science, Integrated Mathematics, Life Science/Chemistry, Integrated Social Studies and/or Integrated Language Arts.
6. Students who have a second major not included in the list above (#5) will have their student teaching requirements determined by faculty from both program areas at the time the program of study is developed, with a minimum 16 weeks spent in the classroom.

## Licensure information

Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged but not required.

Students must apply for State of Ohio Licensure (defined by completion of all licensure program requirements) within 12 months of program completion. After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12 month deadline may have to take additional coursework if the content, methods courses, program requirements, or licensure requirements have changed from the catalog in force.

## Description

The Bachelor of Science in Education degree in Life Science prepares students for teacher licensure in life science, grades seven to 12. Students take a broad range of science-content courses in geology, chemistry and physics, and specialize in biology content. Students in the Life Science major complete most of their content coursework during their first three years; methods coursework typically begins during the spring of their third year. During the final year of the program, students complete remaining content courses, science teaching methods courses and a year-long placement in a local school district, which concludes with 13 weeks of student teaching in the spring. Life Science students are encouraged to meet with their advisor early in their program because many courses must be sequenced carefully.

## Admission Requirements

Admission to this major is selective. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program, it is required that new freshmen have a 2.750 high school GPA. They may then submit a change of program to declare this major.

**Current Kent State and Transfer Students:** Active Kent State students who wish to change their major must have attempted a minimum 12 credit hours at Kent State and meet all admission criteria listed above to be admitted. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

**English Language Proficiency Requirements for International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information on international admission, visit the Office of Global Education's admission website.

## Program Learning Outcomes

Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged but not required.

Students must apply for State of Ohio Licensure (defined by completion of all licensure program requirements) within 12 months of program completion. After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12 month deadline may have to take additional coursework if the content, methods courses, program requirements, or licensure requirements have changed from the catalog in force.

## Description

The Middle Childhood Education (4-9) Social Studies and Science Initial Licensure Preparation non-degree program will prepare students to obtain the Ohio Middle Childhood 4-9 license in Social Studies and Science. Completion of the prescribed coursework is a prerequisite to being recommended by Kent State University for licensure, and licenses are granted by the Ohio Department of Education. The program includes intensive pedagogy courses that prepare students to understand the unique social, physical, cognitive, and emotional needs of the young adolescent; these courses are taken as a cohort. Student teaching occurs during the final semester of the program.

The non-degree program is not a master's degree program. Students interested in obtaining a teaching license and a master's degree from Kent State University must also be fully admitted into a master's degree program and complete the prescribed coursework on the master's degree prospectus, in addition to courses that are prescribed here for licensure.

### Fully Offered At:

## Admission Requirements

Admission to this major is selective. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program, it is required that new freshmen have a 2.750 high school GPA.

Students who do not meet the GPA requirement at the time of admission for this major will be admitted to the EHHS General non-degree program until which time they have established a Kent State GPA of 2.750. They may then submit a change of program to declare this major.

**Current Kent State and Transfer Students:** Active Kent State students who wish to change their major must have attempted a minimum 12 credit hours at Kent State and meet all admission criteria listed above to be admitted. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

**English Language Proficiency Requirements for International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information on international admission, visit the Office of Global Education's admission website.

## Program Learning Outcomes

Graduates of the program will be able to:

1. Demonstrate the knowledge, skills and disposition needed to work collaboratively with diverse others.
2. Demonstrate content knowledge in two licensure specialization areas.
3. Demonstrate in-depth instructional and planning skills to effectively meet the needs of all their students.

## Description

The Bachelor of Science degree in Physical Education and Sport Performance prepares teachers who exemplify best practices in the PK-12 setting and professionals who promote high quality physical activity opportunities for individuals across the lifespan. The program places a strong emphasis on field experience, internships and professional development experiences.

The Physical Education and Sport Performance major comprises the following concentrations:

- The **Health and Physical Education** concentration is a five-year program that provides the curriculum necessary for students seeking Ohio teacher licensure in both health education and physical education. The program includes multiple field experiences in a variety of school districts, followed by a full semester of student teaching. Students teach in both subjects and are eligible to sit for the multi-age teacher licensing examinations. Students in combined

bachelor's/master's degree programs may apply graduate courses toward the B.S.E. degree.

- The **Physical Activity and Sport Performance** concentration is grounded in the understanding that the study of physical activity and sport is important in themselves and as biological and social concepts. The concentration provides students with the opportunity to design their educational experience by developing an individualized program of study. Students in this concentration are required to declare a minor, either in a related field or outside the field.
- The **Physical Education Teacher Licensure** concentration prepares students to seek Ohio teacher licensure in physical education. The program includes multiple field experiences in a variety of school districts, followed by a full semester of student teaching. Graduates are eligible to sit for the multi-age teacher licensing examinations.

### Fully Offered At:

- Kent Campus

## Accreditation

National Council for Accreditation of Teacher Education

## Admission Requirements

Admission to this major is selective. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program, it is required that new freshmen have a 2.750 high school GPA. Students who do not meet the GPA requirement at the time of admission for this major will be admitted to the EHHS General non-degree program until which time they have established a Kent State GPA of 2.750. They may then submit a change of program to declare this major.

Students seeking admission into the Health and Physical Education concentration or the Physical Education Teacher Licensure concentration of this program must meet all professional requirements for admission to advanced study and have a minimum overall 2.750 GPA in all previous undergraduate coursework. Students should contact the Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire into the procedures associated with admission to advanced study. Students transferring from another university should meet with an academic advisor in the College of Education, Health and Human Services at least one semester prior to transferring.

**Current Kent State and Transfer Students:** Active Kent State students who wish to change their major must have attempted a minimum 12 credit hours at Kent State and meet all admission criteria listed above to be admitted. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

**English Language Proficiency Requirements for International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information

on international admission, visit the Office of Global Education's admission website.

1. Demonstrate an understanding of content and scientific and theoretical foundations for the delivery of an effective PK-12 PE and/or Health program.
2. Plan and implement developmentally appropriate and meaningful PE and/or health learning experiences aligned with local, state and/or national standards and grade-level outcomes.

## Description

The Bachelor of Science in Education degree in Physical Science prepares students for teacher licensure in physics and chemistry, grades seven to 12. Students take a broad range of science-content courses in biology and geology and specialize in physics and chemistry content. Students in the Physical Science major complete most of their content coursework during their first three years, and then begin their methods coursework during the spring of their third year. During the final year of the program, students complete remaining content courses, science teaching methods courses and a year-long placement in a local school district, which concludes with 13 weeks of student teaching in the spring. Physical Science students are encouraged to meet with their faculty advisor early in their program because many courses must be sequenced carefully.

## Fully Offered At:

- Kent Campus

## Accreditation

National Council for Accreditation of Teacher Education

## Admission Requirements

Admission to this major is selective. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program, it is required that new freshmen have a 2.750 high school GPA. Students who do not meet the GPA requirement at the time of admission for this major will be admitted to the EHHS General non-degree program until which time they have established a Kent State GPA of 2.750. They may then submit a change of program to declare this major.

**Current Kent State and Transfer Students:** Active Kent State students who wish to change their major must have attempted a minimum 12 credit hours at Kent State and meet all admission criteria listed above to be admitted. Students who have not attempted 12 credit hours at Kent State will be evaluated for admission based on their high school GPA for new students or transfer GPA for transfer students. Transfer students who have not attempted 12 credit hours of college-level coursework at Kent State and/or other institutions will be evaluated based on both their high school GPA and college GPA.

**English Language Proficiency Requirements for International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE Academic score, or by completing the ELS level 112 Intensive Program. For more information on international admission, visit the Office of Global Education's admission website.

## Program Learning Outcomes

Graduates of this program will be able to:

1. Plan multiple lessons using a variety of inquiry approaches that demonstrate their knowledge and understanding of how to engage all students in learning science.
2. Plan a learning environment and learning experiences for all students that demonstrate chemical safety, safety procedures, and the ethical treatment of living organisms within their licensure area.
3. Plan fair and equitable assessment strategies to analyze student learning and to evaluate if the science learning goals are met.

## University Requirements

## Licensure information

Candidates seeking Ohio licensure are required to pass specific assessments in order to apply for licensure. See Ohio Department of Education-Educator Preparation website for more information on assessments specific to licensure type. Taking and passing the licensure tests prior to graduation is encouraged but not required.

Students must apply for State of Ohio Licensure (defined by completion of all licensure program requirements) within 12 months of program completion. After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12 month

deadline may have to take additional coursework if the content, methods courses, program requirements, or licensure requirements have changed from the catalog in force.

## Clinical Education (CLI)

### CLI 80200 STANDARDIZED PATIENTS ROTATION 1 Credit Hour

Offers second year students the opportunity to interview standardized patients and receive feedback on their patient interviewing and history recording skills which prepares them to function competently in a doctor/patient encounter. Some students find that interviewing patients comes naturally, while for others it is more a learned skill. The standardized patients are actors who have been coached to simulate actual patients so accurately that the simulation could possibly fool even a skilled clinician.

**Prerequisite:** Student must be enrolled in the Podiatric Medicine program.

**Schedule Type:** Clinical Laboratory

**Contact Hours:** 4 other

**Grade Mode:** Satisfactory/Unsatisfactory

### CLI 80310 PODIATRIC SURGERY ROTATION 4 Credit Hours

Stresses complete pre-operative and post-operative management of the surgical patient. Many foot deformities can be corrected with surgery. Work up for the purposes of establishing proper diagnosis, selection of appropriate surgical procedure and designing a proper follow-up plan are necessary components of successful surgical outcome. Proper post-operative patient care as well as early recognition of potential surgical complications are stressed. These are essential to a successful surgical practice. While the scope of surgery varies greatly with differences in postgraduate training, there exists a basic core of knowledge and various techniques that are consistent with successful surgical outcome. In order to be a successful surgeon, it is imperative that the student master those basic skills that will be utilized through his or her career. This rotation is the foundation upon which surgical careers are built.

**Prerequisite:** Student must be enrolled in the Podiatric Medicine program.

**Schedule Type:** Clinical Laboratory

**Contact Hours:** 16 other

**Grade Mode:** Satisfactory/Unsatisfactory

### CLI 80315 SURGICAL SKILLS WORKSHOP 4 Credit Hours

Provides students with the knowledge and hands-on training pertaining to the physical skills that are necessary to perform surgery of the foot and ankle. An effort is made to correlate didactic information learned in the classroom with the rationale behind why many surgical procedures are performed. Adequate demonstration of surgical skills are provided along with practice time and constructive performance feedback.

**Prerequisite:** Student must be enrolled in the Podiatric Medicine program.

**Schedule Type:** Clinical Laboratory

**Contact Hours:** 16 other

**Grade Mode:** Satisfactory/Unsatisfactory

### CLI 80320 RADIOLOGY ROTATION 4 Credit Hours

Clinical rotations function by adapting and applying classroom information to real life, "hands-on" situations. A majority of foot complaints necessitate the taking and the reading of radiographs. As specialists of the foot and ankle, podiatrists are in a unique situation in being able to take and interpret radiographs in their own offices. Radiographic analysis is therefore an integral component of podiatric medical education. The Radiology/Medical Imaging rotation focuses on those skills commonly performed by the podiatrist. This includes positioning and developing radiographs along with recognizing the most common pedal pathologies.

**Prerequisite:** Student must be enrolled in the Podiatric Medicine program.

**Schedule Type:** Clinical Laboratory

**Contact Hours:** 16 other

**Grade Mode:** Satisfactory/Unsatisfactory

### CLI 80351 PODIATRIC MEDICINE/BIOMECHANICS (EUCLID) 4 Credit Hours

Gives students the opportunity to perform primary foot and ankle care under the supervision of the clinical faculty. Students learn basic podiatric palliative care techniques on patients, as well as how to record the findings in the medical record. Students are evaluated on their ability to present the case history, treat the patient and properly record their findings. Students receive clinical conferences on a variety of podiatric medical topics with practical exams in many areas. Two months are spent at the Cleveland Foot and Ankle Institute. One month is spent at the Cleveland VA Hospital. This rotation also provides the student with the opportunity for observation and practice of examination skills required in performing a musculoskeletal and biomechanical evaluation. This involves the development of skill in obtaining a biomechanical/musculoskeletal history, arthrometric evaluation, visual gait analysis and musculoskeletal examination to include muscle strength testing, flexibility and range of motion. The student is also taught, and provided opportunities for practice, various methods of obtaining and evaluating proper biomechanical cast impressions of the feet for the purpose of fabricating orthotic devices, Emphasis in this rotation is on the practice and refinement of clinical evaluation and manual skills.

**Prerequisite:** Student must be enrolled in the Podiatric Medicine program.

**Schedule Type:** Clinical Laboratory

**Contact Hours:** 16 other

**Grade Mode:** Satisfactory/Unsatisfactory

**CLI 80352 PODIATRIC MEDICINE/BIOMECHANICS (INDEPENDENCE) 4 Credit Hours**

## Description

The Doctor of Podiatric Medicine degree in Podiatric Medicine prepares student for the podiatric medicine field. The podiatric physician is a health professional who is involved with examination, prevention, diagnosis, and treatment of foot disorders by physical, medical and surgical means. A podiatric medicine doctor is trained to detect the signs of systemic disease which may appear first in the lower extremity, such as diabetes or circulatory disorders. When such diagnoses are made, the podiatric physician consults with the patient's family doctor concerning the systemic disease.

A career in podiatric medicine can include the areas of primary care, surgery, orthopedics, sports medicine, geriatrics and pediatrics.

### **Fully Offered At:**

- Kent Campus - Independence location

## Description

The mission of the College of Public Health is to advance public health by preparing leaders, scientists, and practitioners to collaborate with community partners in conducting impactful research and practice to solve public health challenges.

Kent State University's College of Public Health was established in 2009 to educate and prepare students to meet the current and projected shortage of public health professionals in Ohio and the nation. It is one of only two schools of public health in Ohio and the first to offer a Bachelor of Science in Public Health degree. In addition to the bachelor's degree, the college also offers a Master of Public Health, Master of Science in Clinical Epidemiology and a Doctor of Philosophy degree. The academic programs integrate theory and practice to equip graduates with the knowledge and skills to address and solve the health challenges of the

21st century. Faculty engage in innovative research that seeks answers to some of society's most challenging public health issues. Partners include local health departments, community organizations, health care institutions and businesses; those partnerships provide students with applied practical experiences in public health.

**HPM 53013 SEX: A WICKED PUBLIC HEALTH PROBLEM 3 Credit Hours**

Wicked problems is a term developed in the 1970s by systems thinkers and planners, Horst Rittel and Melvin Webber (1973), to describe complex social problems that are resistant to solution. The term has recently been applied to public health issues that have proven to be difficult to address and resistant to mitigation. Sexual and reproductive health behaviors, attitudes, and cultural norms often produce problems at the individual and population levels that meet the criteria for designation as wicked problems. Effectively addressing these kinds of problems requires a correct understanding and application of public health principles and practices.

## Description

The Bachelor of Science in Public Health degree in Public Health broadly prepares students to enter the workforce as a public health professional or to enter an advanced program of study. Students explore the five disciplines of public health: biostatistics, environmental health, epidemiology, health policy and management and the social and behavioral sciences through general coursework.

The Public Health major comprises the following concentrations:

- The **Allied Health** concentration seeks to augment the career portfolio of the allied health professional or aspiring student. Students who are interested in a generalist focus in public health or interested in moving to a professional degree (accelerated nursing) or technical allied health degree (respiratory care, radiologic technology, occupational/physical therapy assisting, etc.) are encouraged to pursue this path. Students may currently hold or may be actively pursuing a state licensure in an allied health field and may be eligible to receive a maximum 12 credit hours of upper division credit for their prior experience and demonstrated competency in select areas. Students without a state licensure may still pursue this concentration but will complete 12 hours of coursework in allied health specific areas. Students in this concentration will be exposed to broad areas of public health including epidemiology, biostatistics, environmental health, global health and health policy; thus, preparing students to meet the increased demands for a trained and educated public health workforce.
- The **Clinical Trials Research** concentration focuses on training students in the epidemiology methods used in clinical research. The curriculum provides students a thorough understanding of the

management of research studies, the scientific literature related to drugs, medical devices and other new therapies, and the federal regulations related to conducting clinical trials. Students are prepared to design and answer research questions, collect and manage data and communicate research findings to both scientific and lay audiences. An internship experience provides necessary experience in a clinical research setting. Potential places of employment for graduates include hospitals, contract research organizations, medical schools and pharmaceutical companies where graduates assist with and manage clinical research studies.

- The **Community Health Outreach and Development** concentration focuses on identifying and exploring ways to influence the multi-level determinants of population health and health behaviors, from a perspective that prioritizes health equity and social justice. Approaches focus on community- and system-level strategies to promote health and healthy behaviors among populations and eliminate health disparities through media, policy and education initiatives. Career options include the public sector, social services, non-profit agencies and other community-based health promotion and advocacy efforts. Graduates are prepared to assist with developing, implementing and coordinating public health interventions that promote community health and organize diverse communities around issues related to health and health behavior.
- The **Global Health** concentration educates students in identifying and working to address the critical public health and human needs of diverse, underserved and vulnerable populations locally and globally. Students learn the need for multidisciplinary (biological and social sciences) approaches and cooperation to address the major global public health problems. In addition, they have the opportunity to focus on a specific aspect of global health, e.g. HIV/AIDS, health policy, health disparities, health education, environmental health, nutrition. Graduates are prepared to work at entry level positions in public health with local, regional, national or international public health agencies in both public and private sectors. Students who pursue this concentration are required to participate in a study abroad experience and complete four courses (at the elementary and intermediate levels) of either Arabic, Chinese, French, Russian or Spanish
- The **Health Services Administration** concentration establishes a foundation for graduate work in health policy and management. Students analyze national and local public health infrastructure, evaluate the effectiveness and efficiency of health care delivery and explore the legal and ethical issues of health care administration. Graduates enter the health care workforce as finance managers, compliance officers, patient navigators, insurance specialists and other health care managers. Students are encouraged to pair this concentration with a minor.
- The **Pre-Medicine, Dentistry, Osteopathy** concentration includes preparatory courses for the Medical College Admissions Test (MCAT), the Dental Admissions Test (DAT) and admission entry into other professional schools including pharmacy, podiatry, occupational/physical therapy and physicians assistant programs. The overall curriculum—focusing on biological, social and economic determinants of health, prevention and control of diseases, introduction to biostatistics and public health research—makes this program highly desirable for admission to professional schools. The unique features of the program open new opportunities and offer competitive advantages for students seeking to enter into clinical medicine.

### Combined Degree Program - Bachelor of Science in Public Health and Master of Public Health Degrees

A formal combined degree program allows students to earn the B.S.P.H. degree (Health Services Administration concentration) and the M.P.H. degree (Health Policy and Management concentration). Qualified undergraduate students may apply by completing an application for admission to the Master of Public Health degree and securing approval from the college no later than March 1 for acceptance into the fall cohort. Students must consult with their undergraduate and faculty advisors to create a plan substituting selected master's courses for selected undergraduate courses based on approved courses. Following graduation from the B.S.P.H. degree, students' application to the M.P.H. degree may be activated for admission. Please refer to the Combined Bachelor's/Master's Degree Program policy in the Academic Policies section of the University Catalog for eligibility criteria for combined degree programs. Applicants must have completed two semesters of college composition, a college-level mathematics course, PH 10001 and PH 30033.

#### Fully Offered At:

- Online (Allied Health, Clinical Trials Research, Community Health Outreach and Development, Health Services Administration concentrations only)
- Kent Campus (all concentrations)

### Accreditation

The B.S.P.H. degree in Public Health is accredited by the Council on Education for Public Health (CEPH).

### Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Admission decisions are based upon the following: cumulative grade point average, ACT and/or SAT scores, strength of high school college preparatory curriculum and grade trends. The Admissions Office at the Kent Campus may defer the admission of students who do not meet admissions criteria but who demonstrate areas of promise for successful college study. Deferred applicants may begin their college coursework at one of seven regional campuses of Kent State University. For more information on admissions, including additional requirements for some academic programs, visit the admissions website for new freshmen.

**Freshman Students on the Regional Campuses:** Kent State campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Regional Academic Center in Twinsburg, have open enrollment admission for students who hold a high school diploma, GED or equivalent.

**English Language Proficiency Requirements for International Students:** All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score or minimum 48 PTE score, or by completing the ESL level 112 Intensive Program. For more information on

international admission, visit the Office of Global Education's admission website.

## Public Health - M.P.H.

### College of Public Health

131 Moulton Hall  
Kent Campus  
330-672-6500  
publichealth@kent.edu  
www.kent.edu/publichealth

## Description

**Admission to the Health Policy and Management concentration has been suspended temporarily on the Trumbull campus as of fall 2016.**

The Master of Public Health degree in Public Health is designed to help students develop real-world knowledge and skills needed to pursue success in the public health industry.

The Public Health major comprises the following concentrations:

- The **Biostatistics** concentration prepares students in the quantitative science of health data collection, storage, retrieval, analysis and interpretation. Graduates are equipped to use statistical methods to design and analyze health-related surveys and experiments for improving health. The college's faculty research interests include applying biostatistical analysis to understand critical health problems. Graduates in biostatistics are in demand at hospitals, pharmaceutical companies, state and local health departments, federal health agencies and biotechnology companies to analyze the effectiveness of new drugs and interventions, identify risk factors for disease and develop effective prevention strategies.
- The **Epidemiology** concentration prepares students to analyze the distribution and determinants of disease, disabilities and death in populations. Graduates are able to apply quantitative and qualitative methods to investigate disease outbreaks, determine causal relationships between environmental and biological factors, and conduct studies to project health trends in populations. Students in this specialization benefit from public health faculty research agendas in bio-preparedness, public health surveillance systems, chronic disease, cancer and infectious disease epidemiology. Career opportunities for graduates include research positions in universities, medical schools and pharmaceutical companies; disease prevention specialists in hospitals; and surveillance managers in state and local health departments.
- The **Health Policy and Management** concentration prepares students to address public health risks and develop effective health services delivery models. An interdisciplinary program incorporates health services research, health policy analysis and health care planning and management. Given the active research of the college's faculty in identifying service gaps and in developing evidence-based practices and policy analysis, students emerge with strong skills in health services management, alternative models of service financing and strategies for improving services. Career opportunities for

graduates include administrative and management positions in hospitals, clinics, state and local health departments, nursing homes and mental health facilities; policy analyst positions in health planning organizations and governmental agencies; and planning and management positions in health maintenance organizations and health insurance companies.

- The **Social and Behavioral Sciences** concentration provides students with an interdisciplinary approach to improve health in populations across the life course. Students learn to apply theoretical principles to design, implement, and evaluate effective programs that include behavioral and environmental approaches. Graduates are able to design and evaluate public health interventions intended to improve health for families, workplaces, communities, and other settings. The active research of the college's faculty, particularly in the areas of childhood obesity, violence and injury prevention, substance abuse prevention, and chronic disease prevention, provides students the opportunity to work on large-scale externally funded prevention research. Students are prepared for careers in health promotion; program design and evaluation; and prevention program development for state and local health departments, workplace health promotion programs, hospitals, international health agencies, mental health centers and non-profit organizations.

## Introduction

The College of the Arts uses its distinctive and innovative resources in the visual, performing, and design arts to transform students' lives through the arts and to engage local and global communities to imagine, create and transform the world. Our studios, exhibitions, performance spaces and lecture halls offer real world experiences in which students learn and refine skills and put theory into practice. Students work side-by-side with faculty and professionals and create, conduct research and promote art, music, theatre, dance and fashion. Outreach to the larger community is manifested through exhibitions, performances, internships and experiential learning.
