The Ancient, Medieval and Renaissance Studies minor offers a culturally comparative program in which the distance of time lends profound diversity from present experience. The minor allows students to explore the origins and development of Western culture as defined across continents, religions and civilizations, through a range of disciplines (anthropology, architecture, art, fashion, history, language, literature,

music, philosophy, religion and theatre). The program's flexibility encourages students to pursue specific interests, for example, early religion, high medieval culture, classical influences upon the Renaissance or Byzantine culture.

Description

The History and Philosophy of Science minor prepares students from a variety of related disciplines to think about science as a social, historical and philosophical enterprise. It will prepare students for graduate work in history of science, philosophy of science and science and technology studies, as well as for careers in areas of public and educational policy related to science.

Science is arguably the supreme intellectual enterprise of our species. It pervades nearly every aspect of modern society. Scientific research is heavily funded by governments and private institutions; courses in science are requirements at every level of education; scientific accomplishments are honored with awards and prizes; museums display scientific achievements and inventions. Moreover, the sheer depth and breadth of scientific progress through human history is monumental. All of this raises questions about what science is, how it works, and how it manages to be as successful as it is. These questions define the discipline known as the history and philosophy of science, which aims to study science, to understand its goals and methods, its principles and practices and its failures and triumphs.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Description

The Bachelor of Integrative Studies degree provides maximum freedom for students who wish to take a multidisciplinary, individualized approach to the design of an educational program while maintaining a focus on career and professional goals. The Integrative Studies major has a General concentration, and a Two Minors concentration. These concentrations may have the most appeal for students near the end of their academic careers (senior-level students) who are re-evaluating their academic and career choices. It is a program in which the student undertakes the responsibility for the research and design of their program, in consultation with an advisor.

The **Integrative Studies-General** concentration allows students to choose a minimum of 30 credit hours from interrelated programs that support their career aspirations.

The **Integrative Studies-Two Minors** concentration allows students to complete two university-recognized minors and/or certificates. A minimum of two academic departments in which to select courses are chosen and a rationale for the ways in which these courses support the student's career goals is developed.

Admission Requirements

Students, who wish to declare either the General or the Two Minors concentrations of the Integrative Studies major within the Bachelor of Integrative Studies degree, must meet with a B.I.S. academic advisor in the College of Arts and Sciences to discuss their future academic and career goals and to develop an approved program of study. Ideally, students should begin the process for evaluation and program review at or near the time they have a minimum of 60 earned credit hours. In order to declare the Integrative Studies major within the Bachelor of Integrative Studies degree, the procedures listed below must be followed:

1. Visit or call the College Office, 105 Bowman Hall (Kent Campus), to arrange for an initial conference with a B.I.S. advisor (students on the regional campuses should contact their campus advising office for further information on this first step). This conference will include an evaluation of completed coursework and discussion of future academic and career goals. Working closely with an academic advisor, a program of study will be determined and reflected on the degree audit.
2. When the program of study is completed and approved by the College, the student and advisor complete a Change of Program form declaring either the Integrative Studies-General concentration or the Integrative Studies-Two Minors concentrations of the Integrative Studies major within the Bachelor of Integrative Studies degree. College approval of this form completes admission to the program.

Description

The Bachelor of Arts degree in International Relations empowers students to make a difference on a global scale. Whether students are interested in human rights, economic development, international law, peacebuilding, climate change, or some other global question, the program encourages them to understand international problems from a range of perspectives and see more clearly how they can make an impact on them.

The major is interdisciplinary, which enables students to explore issues from such perspectives as political science, economics, and geography, as well as history, literature, and pan-African studies. IR students also engage in advanced language study, enhancing their ability to communicate globally, and they are encouraged to study abroad if they are able. The program has permanent arrangements for study in Florence or Geneva, and more customized opportunities are also possible.

Because of their broad exposure to global issues and their language training, IR majors go on to rewarding careers in almost every imaginable sector, including international organizations, non-profit agencies, business, law, and government. To all of those areas, they bring a multifaceted understanding of the global system, and wherever they go, they make a difference.

¹ Students must complete a foreign language offered at Kent State (Arabic, Chinese, French, German, Italian, Japanese, Russian, Spanish) at the Intermediate II level (or equivalent). This also will satisfy the college's foreign language requirement (see Foreign Language College Requirement below for additional information). In addition, students must either complete two upper-division courses in the same language or complete a second language at the Elementary II level (or equivalent). With approval of the political science undergraduate coordinator, students may apply courses taken in a foreign language abroad and/or by a proficiency exam (e.g., ACTFL) to satisfy all or part of the language requirement.

² A minimum C grade must be earned to fulfill the writing-intensive requirement.

³ Maximum three courses in one subject area from the four elective groups (Global Economics, Global Politics and/or Global Societies electives lists above)

⁴ One additional course taken from the Kent Core Basic Science courses in the following Arts and Sciences disciplines: Anthropology (ANTH), Biological Sciences (BSCI), Chemistry (CHEM), Geography (GEOG), Geology (GEOL) or Physics (PHY). The course may not be from the student's major.

⁵ One additional course taken from the Kent Core Social Sciences courses in the following Arts and Sciences disciplines: Anthropology (ANTH), Geography (GEOG), Criminology and Justice Studies (CRIM), Peace and Conflict Studies (PACS), Political Science (POL), Psychology (PSYC) or Sociology (SOC). Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.¹

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options²:

1. Intermediate I and II of the same language
2. Elementary I and II of a second language
3. Any combination of two courses from the following list:
 - Intermediate I of the same language, or ARAB 21401, ASL 19401, CHIN 25421, MCLS 10001, MCLS 20001, MCLS 20091, MCLS 21417, MCLS 21420, MCLS 22217, MCLS 28403, MCLS 28404

¹ All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

² Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.¹

To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options²:

- Intermediate I and II of the same language
- Elementary I and II of a second language
- Any combination of two courses from the following list:
 - Intermediate I of the same language, or ARAB 21401, ASL 19401, CHIN 25421, MCLS 10001, MCLS 20001, MCLS 20091, MCLS 21417, MCLS 21420, MCLS 22217, MCLS 28403, MCLS 28404

¹ All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

² Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Description

The Paralegal Studies minor provides the foundation for students to pursue the paralegal field. A paralegal is employed by a law office, corporate legal department or public entity to perform substantive legal work under the supervision of a lawyer. Paralegals conduct legal research, maintain and organize files and draft legal documents. Paralegals also work with clients and witnesses in preparing cases for trial.

The program prepares students for the Certified Paralegal exam from the National Association of Legal Assistants. A paralegal is not a lawyer and may not give legal advice, accept cases, argue in court or set fees.

For more information, visit the Paralegal Studies office located in 113 Bowman Hall (Kent Campus); 330-672-4148; www.kent.edu/paralegal.

Description

The Women's Studies minor offers flexible and diverse coursework across a variety of disciplines. Distinct in its commitments—born of women's struggles, movements, lives and work—the program invites students to revise perspectives, make fresh inquiries, broaden and deepen understandings by means of a simple but radical shift: the re-rendering of the female half of the human race not as "the second sex," but as primary, fundamental, essential and real.

The minor emphasizes are inclusiveness, criticality, academic freedom and responsibility.

Description

The Bachelor of Arts degree in Peace and Conflict Studies prepares students for careers or graduate study in the field of conflict management, peace studies and dispute resolution. This major gives students a solid background in managing conflicts in constructive, not destructive, ways. Students learn skills that are not only useful in a variety of workplace settings, but in everyday life and relationships as well.

Program areas of focus include mediation, negotiation, environmental conflict resolution, international conflict resolution, workplace conflict management, nonviolent action and community organizing. As this is an applied program, students learn skills and build professional networks through the internship, which can be completed in a wide variety of contexts.

Admission Requirements

Deferred applicants may begin their college coursework at one of seven regional campuses of Kent State University. For more information on admissions,

including additional requirements for some academic programs, visit the admissions website for first-year students.

Freshman Students on the Regional Campuses: Kent State campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, have open enrollment admission for students who hold a high school diploma, GED or equivalent.

Foreign Language College Requirement, B.A.

Students pursuing the Bachelor of Arts degree in the College of Arts and Sciences must complete 14-16 credit hours of foreign language.¹ To complete the requirement, students need the equivalent of Elementary I and II in any language, plus one of the following options:²

- Intermediate I and II of the same language
- Elementary I and II of a second language
- Any combination of two courses from the following list:

- Intermediate I of the same language, or ARAB 21401, ASL 19401, CHIN 25421, MCLS 10001, MCLS 20001, MCLS 20091, MCLS 21417, MCLS 21420, MCLS 22217, MCLS 28403, MCLS 28404

¹ All students with prior foreign language experience should take the foreign language placement test to determine the appropriate level at which to start. Some students may start beyond the Elementary I level and will complete the requirement with fewer credit hours and fewer courses. This may be accomplished by (1) passing a course beyond Elementary I through Intermediate II level; (2) receiving credit through one of the alternative credit programs offered by Kent State University; or (3) demonstrating language proficiency comparable to Elementary II of a foreign language. When students complete the requirement with fewer than 14 credit hours and four courses, they will complete remaining credit hours with general electives.

² Certain majors, concentrations and minors may require specific languages, limit the languages from which a student may choose or require coursework through Intermediate II. Students who plan to pursue graduate study may need particular language coursework.

Description

The Peace and Conflict Studies minor gives students a solid background in the theory and skills of managing conflicts in constructive, not destructive ways. Students learn how to apply skills that are not only useful in a variety of workplace settings, but in everyday life and relationships as well.

The minor especially is beneficial for students with a major or interest in business, communication studies, criminology and justice studies, nursing, public health, psychology, political science and sociology. However, because the skills taught are life skills, this minor matches up well with many majors.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

The Bachelor of Business Administration degree in Accounting is designed to provide students with a solid foundation in accounting theory and practice necessary for entry-level accounting positions and career advancement. It encompasses a common body of concepts, conventions, principles and theories essential to the professional competency of the certified public accountant, controller, industrial accountant, institutional accountant and governmental accountant.

Accounting students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information.

In addition, students may apply toward a five-year program that leads to both the B.B.A. degree in Accounting and the Master of Science in Accounting degree. The two-degree, five-year program meets the requirements for admission of graduates to the Uniform CPA Examination. Requirements differ in different states, and students should check with the state board of accountancy for requirements.

Description

The Bachelor of Business Administration degree in Economics equips students with a variety of skills sought by employers, including conceptualizing and solving problems; locating, organizing and using relevant information; and analytical ability.

In their junior year, students learn microeconomic and macroeconomic theory and take an econometrics class to learn basic analytical skills. Students then take a series of electives that deal with vital current topics relevant to many careers in which these theories and skills are applied, such as U.S. financial and banking system; the economic relations between the United States and foreign countries; government spending and taxation policies; and the U.S. health system and policy options.

During their senior year, students take a capstone course that utilizes and applies the theory, skills and institutional knowledge learned in the program.

Economics students may apply early to either the M.B.A. degree or the Master of Arts in Economics degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information. Undergraduate students applying to the combined

program with the Master of Arts in Economics degree must have a minimum 3.200 overall Kent State GPA.

Description

The Finance minor allows students to gain some familiarity with financial management, as well as with the financial system of institutions and markets in which firms must operate. Some knowledge of finance is necessary to understand and work in most businesses and organizations. Profits and value creation are the "bottom lines" to which companies direct their efforts. Some acquaintance with investment techniques may help students in managing their personal finances.

The Finance minor is particularly useful for business students in other majors who take the requisite courses, and for other students who desire to acquire some understanding of finance without having to take all the core business school requisites. Both groups are exposed to important fundamentals, yet they also will have the flexibility to consider several areas of finance.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the

A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

To declare the Finance minor, students must have a minimum 2.500 overall Kent State University GPA (effective spring 2022, a minimum 2.000 overall GPA will be required). No Kent State University GPA is required if the student is a first-semester freshman or transfer student admitted in good standing.

Progression Requirements

- Minimum 2.000 overall GPA
- Minimum C grade in FIN 26085 and FIN 36053.

Description

Admission to the Information Systems and Supply Chain Management concentrations have been temporarily suspended as of fall 2020.

The Master of Business Administration degree prepares students for responsible leadership positions in public, private and nonprofit organizations. Regardless of their undergraduate education, students will

find a challenging program designed to meet their specific backgrounds and needs.

The degree is structured for full-time/in-person and full-time or part-time online students:

- The full-time/in-person program is targeted to early career professionals, both nationally and internationally, who wish to jump-start their business career, and to those who wish to make a business-related career change. The program operates in cohorts so that students proceed through the sequence of required courses as a group. Students take six to seven courses a semester (offered in eight-week modules) and are expected to participate in experiential activities such as internships, mentoring and professional development activities. Delivery of the program is accelerated; students are able to earn the M.B.A. degree in 12 to 16 months.
- The online program is designed for those who want maximum flexibility in pursuing their MBA degree. Students can take courses to suit their life: from 1 course at a time to a full-time course load. This is an ideal program for professionals who intend to keep working full-time while pursuing the M.B.A., and for those students who want to pursue their MBA without commuting to campus.

The Business Administration major includes the following optional concentrations:

- The **Accounting** concentration allows students to specialize their degree with courses in managerial and financial accounting, business valuation using financial statements and international accounting. Completion of this concentration is not sufficient to sit for the CPA exam in Ohio unless the student has an undergraduate accounting major.
- The **Business Analytics** concentration allows students to gain the technical, analytical, communication, decision-making and leadership skills needed to glean useful information from data to make strategic business decisions.
- The **Economics** concentration allows students to specialize their degree with advanced topics in various areas in economics.
- The **Finance** concentration allows students to specialize their degree with advanced courses in investments, financial markets and institutions, real estate and other related areas.
- The **Human Resource Management** concentration allows students to specialize their degree with advanced topics in employee selection and appraisal, organizational analysis and the opportunity for real-world applications.
- The **Information Systems** concentration allows students to specialize their degree with advanced topics in database management systems, emerging hardware and software technology and other related area courses. Admission to this concentration is suspended.
- The **International Business** concentration allows students to specialize their degree with courses in accounting, marketing, finance and strategy with an international focus. Study abroad options are possible, with no language skills required.
- The **Supply Chain Management** concentration allows students to specialize their degree in vendor-customer relationships and logistic matters, with courses in global supply chain management, supply chain business models and vendor management strategies. Admission to this concentration is suspended.

All concentrations (other than those that are suspended) are available to students in the full-time/in-person program. The Business Analytics and International Business concentrations are available to students in the online program.

Students may pursue an online stackable certificate pathway to the M.B.A. by completing the Management and Leadership graduate certificate, the Financial Management graduate certificate and a set of remaining courses to earn the M.B.A. degree.

M.B.A. students have the opportunity to complete a dual degree with the **Doctor of Podiatric Medicine degree**. A separate application must be submitted for each program. Students can view admission requirements for each program on their respective catalog page.

Description

The Bachelor of Business Administration degree in Business Analytics provides students with understanding of the diverse knowledge they need to be effective business data analysts. The focus of the major is to develop students who will understand and be able to apply business analytics to real-world problems.

While the major's curriculum builds student expertise from theory, the focus is the practical application of the analytics knowledge. Therefore, the major primarily emphasizes problem-solving with data for strategic business decision-making using various analytics tools such as data visualization and machine-learning technologies. Examples of business analytics applications include marketing analysis or segmentation, city planning, delivery logistics, risk management, security and healthcare management.

Graduates from the program will be in demand for entry-level analytics positions in the workforce.

Description

The Bachelor of Business Administration degree in Computer Information Systems provides students with a focus on the creation and supervision of the information systems that are commonly used in organizations of all types and sizes. There is a primary emphasis on problem-solving involving cloud computing systems and infrastructure, creating intuitive systems, business modeling and agile design, data management and business intelligence, cloud systems integration and project management and business experience.

Examples of information systems include airline reservation systems, mobile apps, bank automated teller systems, trading systems for stock exchanges, social media platforms and accounting/auditing systems.

Students can select electives to complement their knowledge base and interests such as in application design and development and other computing infrastructure that focus on the creation and maintenance of application used in smart phones and similar technologies and prepares students for careers as development engineers and system analysts. Students learn to use and manage cloud-based platforms to support and manage business processes and operations in organizations. Some material taught in courses correlate with the knowledge needed to pass professional certification exams.

Students participate in an internship, which involves a summer or a semester of paid professional experience in industry. Internship experience helps show the relevance of on-campus courses to professional work, helps students focus their career plans and often enables students to secure better jobs upon graduation.

Computer Information Systems students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information.

Description

The Computer Information Systems minor is self-contained and assumes essentially no prior experience with computers or information systems. It complements students' primary career field by providing knowledge and hands-on experience in cloud computing systems and infrastructure, business modeling and agile design, data management and business intelligence and other computer technologies. Students are able to design and build computer information systems of modest size and to participate with professional analysts, on an effective partnership basis, in the construction of large cloud systems. Students also have the ability to aid their co-workers by performing computer system support in consultative and advisory roles.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

To declare the Computer Information Systems minor, students must have a minimum 2.500 overall Kent State University GPA. No Kent State University GPA is required if the student is a first-semester freshman or transfer student admitted in good standing.

Description

The Human Resource Management minor focuses on the competitive advantage derived from the more effective use of human resource management policies, practices and procedures. The minor is relevant to a variety of students who want to learn to better manage a company's human resources in many positions after graduation, including line managers who need to implement human resource policies as they hire and manage the performance of their employees; entrepreneurs who need a fundamental knowledge of human resources management to run their companies more effectively; and members of not-for-profit organizations who need to understand the basics because they rarely are able to hire human resources staff.

The Human Resource Management minor covers a range of topic areas taught from both theoretical and applied perspectives. Students are

exposed to a wide array of human resource functional areas, including staffing, performance management, training, compensation, human resource information systems and employer-employee rights and responsibilities.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

To declare the Human Resources minor, students must have a minimum 2.500 overall Kent State University GPA. No Kent State University GPA is required if the student is a first-semester freshman or transfer student admitted in good standing.

Description

The International Business minor introduces students to cultural issues of a broad, global nature. Students are encouraged to participate in study-abroad programs to complement their studies. Global business is fast becoming an important part of the U.S. economy. The world that college graduates are facing will essentially be a borderless world. This suggests a need to be trained for employment that will have international implications. Whether students take a major in business, fashion design and merchandising, the hard sciences, English or education, some training in global outreach, cultural diversity and "business cultures" will be necessary.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Description

Leadership styles, organizational structure and behavior and a global perspective form the common ground between the military and business. The Military and Leadership Studies minor provides an overview of management, leadership and international business. Students will gain military perspective through hands-on experience as well as coursework. The interdisciplinary minor is open to all students.

A minor in Military and Leadership Studies allows students who have completed specialized ROTC or military service courses to receive credit for this training. Normally, these courses are applied as electives within a degree program. The minor provides proof on a student's transcript that they have specialized in the area of Military and Leadership Studies.

Description

The Bachelor of Business Administration degree in Entrepreneurship provides students with the academic background and experiential opportunities needed to view business opportunities from an entrepreneurial perspective. The program helps students recognize market and business opportunities and learn when to seize them or take action, all while operating within the context of limited resources and creating value for the customer.

The program contains numerous opportunities to experience entrepreneurship firsthand. During their senior year, students earn course credit by launching and running a business of their own creation. A practicum can earn students credit while developing their own business or assisting entrepreneurs with their business. Students have many opportunities to meet experienced entrepreneurs who discuss their successes and failures in business. Courses in the major are hands-on, with experiential learning central to the course format.

Entrepreneurship students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information.

Description

The Bachelor of Business Administration degree in Managerial Marketing prepares students to be marketing practitioners by helping them to fully develop the analytical, decision-making and communications (written and oral) skills used and valued by individuals working in this field. Faculty engage each student in active learning through hands-on assignments, case studies, projects with real businesses, and dynamic interactions with the faculty member and other students in the classroom. Each course aims to strengthen writing skills by emphasizing logical flow, persuasiveness and succinctness. Because coursework is sequential and integrated, each course builds upon prior classes to give students a comprehensive body of knowledge, skills and abilities.

The objective of this program is to educate students to function effectively in business environments where they will have to make autonomous decisions and be required to take action on their own initiative.

Managerial Marketing students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information.

Description

The Bachelor of Business Administration degree in Marketing provides a general approach that can be applied in a wide range of areas of business (e.g., for profit, nonprofit, service and manufacturing). The program addresses the breadth within the marketing field through courses (e.g., consumer behavior, marketing research, international marketing, personal selling, advertising and promotion management) that provide the student with an appreciation of all central topic areas in the field.

The program gives students a generalist's perspective and working knowledge of the theory and practice of marketing. Students learn the tasks involved in the analysis, planning, implementation and control of marketing programs that result in strategies and tactics used by businesses to sell products to consumers and other businesses. Typically, a traditional lecture format is used by instructors in this program.

Marketing students may apply early to the M.B.A. degree and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program policy in the University Catalog for more information.

Description

In today's highly competitive business environment, successful managers must have a strong focus on providing customer satisfaction as well as the ability to research consumer needs, wants and desires; understand

what these mean in terms of company offerings; and communicate the benefits of their products or services effectively. The Marketing minor helps students develop the perspectives and skills necessary to understand consumers and to provide customer satisfaction. Students completing the minor should be equipped to bring a marketing orientation to both profit and not-for-profit organizations.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

- To declare the minor, students must have a minimum 2.500 overall Kent State University GPA. No Kent State University GPA is required if the student is a first-semester freshman or transfer student admitted in good standing.

Description

The College of Communication and Information includes the Schools of Communication Studies, Emerging Media and Technology, Information, Media and Journalism, and Visual Communication Design.

The college is the only one in the nation that offers degree programs from five distinct but interrelated fields of study – media, design, communication, information and technology.

Students want to pursue their interests and engage with their talents – and the College is here to help them do just that. The evolution of digital and electronic media has blurred the distinctions among communication and information disciplines. With degree programs in the most relevant fields today and a range of interdisciplinary courses, students will be prepared for the new information and digital media landscape. Whether students are designers, public speakers or tech experts, the cross curricular majors and minors in CCI will help them develop the media, advocacy, web and design skills to succeed and grow – and still graduate on time.

- Official transcript(s)
- Goal Statement²
- Letters of recommendation from those in a position to evaluate graduate academic performance and potential
- Sample of superior scholarly writing (published paper, major term paper, thesis chapter, etc.).

It is expected that this statement will clearly indicate why the applicant wishes to pursue doctoral education. Included in the statement should be an indication of the theoretical area or areas the applicant wishes to study and the line of research the applicant wishes to pursue. Statements that make reference only to the applicant's teaching or administrative goals are strongly discouraged.

Description

The key to the Bachelor of Arts degree in Communication Studies is flexibility. The curriculum allows students to design a program of coursework that's right for them, serves their goals, and prepares them for the future. When employers are asked what they look for in new hires, communication skills top the list every time. Communication Studies prepares students with the knowledge, skills and abilities to succeed across industries – from government and business to nonprofits and education. Communication Studies mission is to teach students to think analytically, reason critically, communicate effectively, lead responsibly, and to understand how communication affects identities, communities and cultures.

The Communication Studies major comprises the following concentrations:

Combine theoretical knowledge and technical skills while mastering professional tasks such as conducting training seminars, creating web content, designing promotional materials, managing communication campaigns and writing press releases.
- **Communication Studies–General:** Features flexibility and choice. Students create a personalized plan of study tailored to their specific academic interests and career goals. This concentration is appropriate for those who have diverse academic interests.

Students may apply early to the Master of Arts degree in Communication Studies and double count 9 credit hours of graduate courses toward both degree programs. See the Combined Bachelor's/Master's Degree Program Policy in the University Catalog for more information.

There are many study abroad/away opportunities. For more information contact the Office of Global Education or coordinator of the college's International Study Programs.

Description

The Communication Studies minor allows students to improve their speaking abilities, as well as their listening, problem-solving and decision-making skills. Effective communication skills are consistently rated as one of the top three proficiencies employers desire in new hires. Whether students' major is in architecture or zoology, communication skills are necessary for effective interaction.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

To declare the Communication Studies minor, students must have a minimum 2.000 overall Kent State University GPA. No Kent State University GPA is required if the student is a first-semester freshman or transfer student admitted in good standing.

Program Learning Outcomes

Students completing this minor will be able to:

1. Display competence in verbal, nonverbal, and written communication.
2. Advocate courses of action to stimulate improved decision-making.
3. Influence others through demonstrated presentational speaking skills.
4. Communicate ethically.
5. Foster inclusive dialogues and tailor messages that respect diversity, empower others, and bring about social change.

6. Articulate creative, effective, and evidenced-based solutions to communication problems.

Description

Admission to the Bachelor of Arts degree in Digital Sciences has been temporarily suspended as of spring 2021.

The Bachelor of Arts degree in Digital Sciences is designed to provide students with the ability to adapt and succeed in a rapidly changing digital world. The program provides a broad overview of digital technologies, often from multiple points of view. For example, a student may study the content and visual layout of a web page with a journalism professor and later study the programming aspects of a web page with a business professor. A course with an architect adds more material on design, and a course with a computer scientist adds additional programming skills. This multidisciplinary skill set adds the flexibility needed for many of today's careers.

Building on this broad overview, the program adds further depth in technical topics, societal issues, and project management. Students gain additional technical competency by studying information management, database systems and digital security. Finally, students learn how to work on a team by studying requirements engineering, project management and team dynamics.

Programs in the College of Communication and Information are, by nature, innovative, interdisciplinary and collaborative, which is critical to both professional and scholarly disciplines. Students are educated to work at the intersections of communication, information and technology. Through a core of diverse theory- and practice-based courses, students learn basic concepts that apply across the range of college programs and develop a sense of professional expectations and build toward interdisciplinary thinking and application.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Freshman Students on the Kent Campus: The freshman admission policy on the Kent Campus is selective. Admission decisions are based upon the following: cumulative grade point average, ACT and/or SAT scores, strength of high school college preparatory curriculum and grade trends. The Admissions Office at the Kent Campus may defer the

admission of students who do not meet admissions criteria but who demonstrate areas of promise for successful college study. Deferred applicants may begin their college coursework at one of seven regional campuses of Kent State University. For more information on admissions, including additional requirements for some academic programs, visit the admissions website for first-year students.

Freshman Students on the Regional Campuses: Kent State campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, have open enrollment admission for students who hold a high school diploma, GED or equivalent.

English Language Proficiency Requirements for International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education's admission website.

Transfer, Transitioning and Former Students: For more information about admission criteria for transfer, transitioning and former students, please visit the admissions website.

Description

Admission to the Master of Digital Sciences degree in Digital Sciences has been temporarily suspended as of spring 2021.

The Master of Digital Sciences degree in Digital Sciences is designed to augment a student's skill set, opening the door to new career opportunities for students from diverse undergraduate backgrounds. Due to the program's interdisciplinary nature, students have a unique opportunity to gain a graduate-level introduction to several areas aligned with digital sciences.

The Digital Sciences major comprises the following concentrations:

- The **Data Science** concentration focuses on the data analysis and modeling needed by an organization and the processing of structured, semi-structured and unstructured data using statistical and semantic analysis techniques to meet those needs.
- The **Digital Systems Management** concentration focuses on the technical leadership needed by an organization and the management of information services in a rapidly changing global economy.
- The **Digital Systems Software Development** concentration focuses on the software applications needed by an organization and the design and maintenance of software systems that are aligned with the goals of the business.
- The **Digital Systems Telecommunication Networks** concentration focuses on the communication infrastructure needed by an organization and the design and management of a telecommunication system and computer network to meet those needs.
- The **Digital Systems Training Technology** concentration focuses on the educational applications needed by an organization and the design and management of instructional systems to meet those needs.
- The **Enterprise Architecture** concentration focuses on the business goals, processes and technology infrastructure needed by an organization and the alignment of the processes and infrastructure with the goals of the business.

Description

The Bachelor of Science degree in Emerging Media and Technology offers students the space to play, imagine and solve problems. The

degree program draws on a number of disciplines, including emerging media, design, information sciences, human-computer interaction and communication. The technology curriculum is grounded in social science and the humanities, introducing students to theories of how technology shapes and changes people and societies. Students learn technical applications and skills in problem solving, design, user experience, creative applications and programming. Students synthesize technical and organizational skills in a series of experiential, hands-on and project-based courses in which they work collaboratively in interdisciplinary teams.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Freshman Students on the Kent Campus: The freshman admission policy on the Kent Campus is selective. Admission decisions are based upon the following: cumulative grade point average, ACT and/or SAT scores, strength of high school college preparatory curriculum and grade trends. The Admissions Office at the Kent Campus may defer the admission of students who do not meet admissions criteria but who demonstrate areas of promise for successful college study. Deferred applicants may begin their college coursework at one of seven regional campuses of Kent State University. For more information on admissions, including additional requirements for some academic programs, visit the admissions website for first-year students.

Freshman Students on the Regional Campuses: Kent State campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, have open enrollment admission for students who hold a high school diploma, GED or equivalent.

English Language Proficiency Requirements for International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education's admission website.

Transfer, Transitioning and Former Students: For more information about admission criteria for transfer, transitioning and former students, please visit the admissions website.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate competency in the technical skills needed to pursue jobs in emerging media and technology, which includes web development, coding, data, human-computer interaction, creative applications, programming and problem-solving.
2. Utilize emerging media technologies to design better experiences, improve existing systems and analyze digital social structures.
3. Recognize the rapidly changing nature of emerging media and technology and learn the skills needed to adapt.
4. Apply interdisciplinary solutions to solving technical, social and human problems related to emerging media and technology.

5. Employ teamwork and project management as a problem solving technique.
6. Critically analyze the effectiveness of their own work and the work of others.

Description

The Web Design and Development minor allows students to develop the fundamental skills needed to pursue jobs in web development, web design and related fields. Students learn technical applications and skills in problem solving, design, user experience, creative applications and coding. Students have the opportunity to use new and emerging technologies to design engaging multimedia experiences, improve existing systems, and study digital social structures. They will also gain experience working in diverse teams and communicating goals, needs, and processes to peers, clients, and consumers.

Web developers are software engineers who understand not only the full technological "stack" that powers modern websites, but who are also conversant in and able to make connections between the design, content and business aspects of web development. Web developers work with content providers, visual designers, and user experience designers. They are coders who use languages such as HTML, CSS, Python, Javascript, MySQL, PHP as well as frameworks used in web development such as Ruby or React. Web developers are also familiar with Content Management Systems, used to ensure that content and services can be delivered to end users. Please see the Web Programming minor offered by the Department of Computer Science in the College of Arts & Sciences for a distinct program with greater emphasis on back-end programming and database management.

Admission Requirements

Admission to a minor is open to students declared in a bachelor's degree, the A.A.B. or A.A.S. degree or the A.T.S. degree (not Individualized Program major). Students declared only in the A.A. or A.S. degree or the A.T.S. degree in Individualized Program may not declare a minor. Students may not pursue a minor and a major in the same discipline.

Program Learning Outcomes

Graduates of this program will be able to:

- Demonstrate competency in the fundamental skills needed to pursue jobs in web development, web programming, web design and related fields.
- Recognize the rapidly changing nature of web development technology and learn the skills needed to adapt.
- Assess the societal and individual impact of new/emerging web and mobile technologies.

Description

The Master of Science degree in Health Informatics prepares graduates for careers in managerial, analytical, consultative and executive roles working with healthcare systems and clinicians.

Health informatics is the science of evaluating, implementing and utilizing technology to manage all information related to the patient care delivery process: clinical, financial, technological and enterprise-wide.

Three major components comprise the health informatics discipline: (1) the information systems component focuses on such issues as information systems analysis, design, implementation, management and leadership; (2) the informatics component is concerned with the study of structure, function and transfer of information, socio-technical aspects of health computing and human-computer interaction; and (3) the information technology component focuses on computer networks, database and systems administration, security and programming.

The informatics field also draws contributions from computer science, the clinical sciences, social and organizational influences and business practices.

Description

The Master of Science degree in Knowledge Management prepares professionals to serve as leaders in all types of organizations who can assess and evaluate organizations on knowledge management principles, including culture, learning, communities and maturity. Graduates will be able to build strategy for effective knowledge management for organizations.

The skills and tools required to manage a knowledge organization build upon, but are different from, those required to manage an industrial-era organization. These new skills and tools are found in the emerging domain of knowledge management. Knowledge management organizations of all types, in all sectors of the economy, face a growing need for knowledge management professionals. In fact, knowledge organizations are created and sustained by knowledge management

professionals working side-by-side with corporate executives, business and subject matter experts. A knowledge organization works smarter at the organizational, the community and the individual level because knowledge management professionals envision and strategically manage the organization's knowledge, design knowledge architectures and build technologies that enable the organization to work smarter. and facilitate knowledge management on a daily basis.

Students in the program learn principles, values, assessment and best practices from their instructors and fellow students, many of whom are also professionals working in knowledge management. Through courses and internships, students are provided real-world, practical experience.

Description

The Master of Library and Information Science degree prepares students for professional positions in public, academic, special and school libraries; archives; museums; and other types of information agencies, organizations and companies. Many M.L.I.S. graduates go on to positions in other areas of the information field besides libraries — in research, for example, or publishing, information management, competitive business intelligence and more. An accredited M.L.I.S. degree is the basic requirement for professional employment in most libraries and information centers.

Students can concurrently pursue a dual degree option with the Master of Business Administration degree. Each program makes an independent admission decision. For further information about the dual degree program, see the specific program section in this catalog.

Description

The Master of Science degree in User Experience Design prepares students for careers that require them to apply a solid understanding of usability, content strategy, information architecture and user research.

The user experience designer engages in a variety of design activities that help produce usable interfaces and help organizations meet business goals. User experience design addresses the structural, informational, psychological and emotional aspects of what makes a successful user interface, whether it is Web, mobile, tablet or any other device.

At Kent State University, user experience design is thought of as a process where students learn, understand, imagine, evaluate and

inform. The design team begins by gathering data/information about users, clients, the organizational culture, common tasks and work environments. After sufficient data/information is gathered, the team seeks to understand the context in which the project will be undertaken. This phase is the bridge between data collection and design. Design in the imagine phase involves brainstorming, iterative prototyping and critiquing. The design team needs to constantly evaluate their designs to see if they work in the real world. This may involve activities such as paper prototyping, high-fidelity interactive prototyping and usability testing. The results of design must be communicated to appropriate audiences. This informing process involves giving presentations to clients and stakeholders, report writing and other forms of communication.

Description

Journalists are reporters, watchdogs, storytellers. The Bachelor of Science degree in Journalism teaches students how to cover real stories that make a difference. Whether using a camera, a microphone, a smartphone or a laptop, students become journalists by doing journalism inside and outside the classroom.

Gaining critical skills that equip them for storytelling in all its forms, students will practice their craft in Kent State's award-winning student media. Working with these outlets, students will learn how to engage audiences where they "live," on TV, radio, online, social media and in print.

Journalism students will produce news and feature content on visual, digital and emerging platforms, and they'll apply what they've learned as part of the required professional internship.

With a grounding in ethics and an understanding of media's role in democratic society, students graduate prepared to continue as journalists or apply their skills to other professions that value critical thinking, information gathering and the ability to make sense of it for others.

Description

The Master of Arts degree in Media and Journalism is designed to give students a solid background in preparation for a professional career. Students are able to take a mix of online and face-to-face courses that allow them to craft a graduate degree that reflects their career interest. Courses are dynamic, challenging and professionally relevant. With small class sizes, students are able to learn from their professors and from the experiences of their fellow classmates, many of whom are working media professionals or nationally recognized journalism educators.

The Media and Journalism major offers the following optional concentration:

- The **Journalism Education** concentration is intended for those seeking to teach or advise student journalists. The program is affiliated with Kent State's Center for Scholastic Journalism, and faculty include some of the most-recognized high school journalism educators in the country. The coursework focuses on concepts and lessons that can be used in a teacher's classroom right away, with a professional project as the culminating requirement.

Students not selecting the concentration work with their advisor to plan a course of study that meets their professional needs, with the culminating requirement of either a thesis or professional project.

The School of Media and Journalism provides its students with a strong foundation to achieve their goals in the rapidly changing media industry. All students take a series of core courses that provide the foundation for a career in media and journalism and develop a specialization through the selection of elective courses that can be within or outside of the school. One student may choose to hone skills as a multimedia journalist focusing on public affairs, while another may seek to develop expertise as a public relations professional for not-for-profit organizations.

Description

The Bachelor of Science degree in Public Relations can take students from corporate boardrooms and creative agencies to sports arenas, the halls of Congress, global nonprofits, hospitals, fashion runways, and beyond. Students graduate with a grounding in the practice of responsible advocacy and a firm grasp of the inclusive communication practices.

Kent State boasts the only public relations program in Ohio that is both certified by the Public Relations Society of America (PRSA) and accredited by the Accrediting Council on Education in Journalism and Mass Communication (ACEJMC).

This degree is rooted in professionalism, with a focus on developing writing, critical thinking, digital and visual communication skills, as well as analytics and strategic multimedia storytelling. Students learn to deliver messages through social media, websites, podcasts, videos, press releases and other media tools, events, public policy and more.

Classes routinely involve researching, creating and presenting a public relations plan for real clients. Students will build a strong portfolio through hands-on learning opportunities, including two student

agencies, a required professional internship, and public relations campus jobs. Kent State's chapter of the Public Relations Student Society of America (PRSSA) and its members consistently win awards at national conferences, placing the chapter in the top tier nationwide.

Description

The Bachelor of Fine Arts degree in Photography provides the student with a comprehensive program of study, balancing a liberal arts education with studio offerings in digital photography. Grounded in formal, technical and conceptual skills building, the Photography major focuses on the profession of photography as it relates to commerce. The program builds a photography professional through experiential learning opportunities, as well as through required courses in design.

Programs in the College of Communication and Information are, by nature, innovative, interdisciplinary and collaborative, which is critical to both professional and scholarly disciplines. Students are educated to work at the intersections of communication, information and technology. Through a core of diverse theory- and practice-based courses, students learn basic concepts that apply across the range of college programs and develop a sense of professional expectations and build toward interdisciplinary thinking and application.

There are many study abroad/away opportunities. For more information contact the Office of Global Education.

Accreditation

National Association of Schools of Art and Design

Admission Requirements

Admission to this major is selective. The School of Visual Communication Design recognizes that competence in visual design, as well as intellectual capacity, are necessary qualities in students who plan to prepare for a career in visual communication design or photography. Therefore, the right is reserved to require evidence of achievement in design and related areas from all students aspiring to enroll for the first time as majors in the school. Early admission is recommended.

The school director may impose additional requirements considered reasonable and necessary. Each transfer student will be evaluated individually in terms of his or her ability to perform within the program. A transfer applicant's strengths and deficiencies will be considered and his or her transfer credits will reflect that consideration.

English Language Proficiency Requirements for International Students:

All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. Description

The Bachelor of Arts degree in Visual Communication Design prepares students for the graphic design and illustration professions. Students develop technical understanding and design skills in the organization of imagery and typography to communicate information in two-dimensional and three-dimensional forms. Students produce work for print, motion, video, screen displays, and interactive experiences, as well as package design, exhibition design, and environmental wayfinding.

This program focuses on design and illustration in the context of a broad liberal arts program, giving students the flexibility to choose 20 percent of their coursework (with guidance). This provides the opportunity for students to take a variety of courses to complement their design degree. Students learn at the intersections of communication, information, and technology. The B.A. degree program is for students planning to attend a graduate program or plan to pair their visual communication design degree with another field of study.

For students looking to work as a design professional, the B.F.A. program is recommended.

Through a core of diverse theory- and practice-based courses, students learn basic concepts that apply across the range of college programs and develop a sense of professional expectations and build toward interdisciplinary thinking and application.

There are many study abroad/away opportunities. For more information contact the Office of Global Education or coordinator of the college's International Study Programs.

Admission Requirements

The university affirmatively strives to provide educational opportunities and access to students with varied backgrounds, those with special talents and adult students who graduated from high school three or more years ago.

Freshman Students on the Kent Campus: The freshman admission policy on the Kent Campus is selective. Admission decisions are based upon the following: cumulative grade point average, ACT and/or SAT scores, strength of high school college preparatory curriculum and grade trends. The Admissions Office at the Kent Campus may defer the admission of students who do not meet admissions criteria but who demonstrate areas of promise for successful college study. Deferred

applicants may begin their college coursework at one of seven regional campuses of Kent State University. For more information on admissions, including additional requirements for some academic programs, visit the admissions website for first-year students.

Freshman Students on the Regional Campuses: Kent State campuses at Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas, as well as the Twinsburg Academic Center, have open enrollment admission for students who hold a high school diploma, GED or equivalent.

English Language Proficiency Requirements for International Students: All international students must provide proof of English language proficiency (unless they meet specific exceptions) by earning a minimum 525 TOEFL score (71 on the Internet-based version), minimum 75 MELAB score, minimum 6.0 IELTS score, minimum 48 PTE score or minimum 100 DET score; or by completing the ESL level 112 Intensive Program. For more information on international admission, visit the Office of Global Education's admission website.

Transfer, Transitioning and Former Students: For more information about admission criteria for transfer, transitioning and former students, please visit the admissions website.

The director of the School of Visual Communication Design may impose additional requirements considered reasonable and necessary. Each transfer student will be evaluated individually in terms of his or her ability to perform within the program. A transfer applicant's strengths and deficiencies will be considered and his or her transfer credits will reflect that consideration.

Program Learning Outcomes

Graduates of this program will be able to:

1. Demonstrate an understanding of the ethics (and legal issues) closely associated with fields of visual communication.
2. Demonstrate an understanding of traditional hands-on skills relative to craftsmanship. Students will demonstrate an understanding of the basic use of digital technologies as they relate to their areas of study.
3. Demonstrate an ability to create visual response to communication problems, including understanding of hierarchy, typography, aesthetics, composition and construction of meaningful images.

Description

The Bachelor of Fine Arts degree in Visual Communication Design prepares students for design and illustration professions. Students develop technical proficiency and design expertise in the organization of

imagery and typography to communicate information in two-dimensional and three-dimensional forms using interactive media, environments and motion design. Students produce work for print, video, screen and interactive experiences, as well as package design, exhibition design and environmental wayfinding.

This major leads to a professional degree and focuses on intensive work in the visual arts. The B.F.A. degree consists of approximately two-thirds of the coursework in the creation and study of the visual arts, with the remainder in liberal/general studies. Because of the greater emphasis on upper-level studio courses, the B.F.A. degree allows students an opportunity to build greater expertise in a given area of the field. The B.F.A. degree program is for students planning to pursue a career in visual communication design and want to leave Kent State with a strong portfolio.

There are many study abroad/away opportunities. For more information contact the Office of Global Education or coordinator of the college's International Study Programs.

¹ Successful completion of VCD 60009 is a requirement in every School of Visual Communication Design graduate program for both M.A. and M.F.A. students after the first semester or 12 credit hours of course completion. Successful completion of the examination designates the student as a candidate for the degree.

² The thesis is a significant project or body of work done independently of other coursework. Students are expected to demonstrate the ability to conduct research or produce an original project in a discriminating and disciplined manner. The thesis topic should be one that will further the student's knowledge and ability in the specialty by demonstrating skill as a researcher or professional designer/illustrator. The outcome should be an effort that serves as a foundation for the pursuit of independent work when the graduate program is completed. At this stage, students are expected to work in close consultation with their thesis advisor.

Graduation Requirements

- The Master of Fine Arts program requires the successful completion of 60 credit hours of graduate credit and requires a thesis.
- The final examination is at the completion of the studio or research thesis. The final examination is the presentation and defense of the thesis and is also an examination of the graduate student's general comprehension of visual communication design. Graduate students are expected to follow the university schedule of deadlines for taking the final examination and presenting thesis materials.

College Policies

EHHS General

The non-degree EHHS General category is intended for students who are exploring programs in EHHS and are not yet ready to declare a major or do not meet the criteria for their intended major. Because a degree cannot be earned while in EHHS General, it is important that students declare a major before earning 45 credit hours to facilitate timely progress toward a degree. Students will not be permitted to continue in EHHS General after accumulating 45 credit hours.

Repeating Field Experience Courses in Teacher Education Programs

Teacher candidates are permitted to repeat a field experience course once (see major requirements for specific courses). If a teacher candidate is unsuccessful in completing OR fails to earn the required grade in a field experience course the first time, the teacher candidate will receive a warning and will be required to work with a faculty advisor in their academic unit to develop a plan for continuation. The required grade is a C or better in a course that awards a letter grade, or Satisfactory (S) in a course that awards an S/U grade. The plan will include all actions necessary to continue in current program, the opportunity to declare a different program, a timeline of when actions should occur, and next steps if actions are not followed. If the teacher candidate does not earn the required grade in the field experience course the second time, a hold will be placed on their account, preventing them from registering for classes until they change their major out of the education program.

Residence Requirement Policy for Non-Degree Teacher Education Licensure/Endorsement Preparation Programs

- Non-degree licensure (initial and additional) and endorsement programs that are a total of 15 credits or above: Students must complete 60% of the coursework at Kent State University, including the course that addresses the CAEP A.1.1 Standard as designated by the program area.
- Non-degree licensure (initial and additional) and endorsement programs that are less than 15 total credits: Students must complete 100% of the coursework at Kent State University.
- Students are permitted 6 years to complete licensure programs and 4 years to complete endorsement programs at Kent State University.
- Coursework transferred from another university cannot be more than 6 years old at the time the licensure/endorsement program is completed.
- Students who do not meet the residence requirements will not be recommended for licensure by Kent State University.

Professional Dispositions for Teacher Candidates

Professional dispositions are the professional attitudes, values, and beliefs demonstrated through both verbal and non-verbal behaviors as educators interact with students, families, colleagues, faculty, and communities. The teacher education faculty believe that the following dispositions support student learning and development. Therefore teacher candidates are expected to demonstrate:

- Communication and Collaboration
- Fairness and Equity
- Ethical Behavior
- Professional Responsibility

These dispositions are assessed at least three times in a candidate's program:

- Education in a Democratic Society course,
- a methods course with a field component, and
- student teaching.

In addition, a disposition assessment may be completed by a faculty member at any time a situation calls for it. A disposition is considered 'acceptable' if a candidate does not have an outstanding Professional Disposition Plan (PDPs) that requires improved performance in specified areas. A candidate may not progress through the teacher education program if they have any PDPs submitted and unresolved at the following three points:

- Applying for advanced study: If a student has an outstanding PDP at the time of application, a student will not be able to apply for advanced study until the PDP is rectified.
- Prior to the student teaching semester: All outstanding PDPs must be completed and cleared prior to the start of student teaching.
- End of student teaching semester: A student with an outstanding PDP during the student teaching semester will not successfully pass student teaching.

Professional Education Warning

Professional Education Warning for students in teacher licensure programs and the Community Health Education major must have a minimum 2.75 GPA to progress in their programs and ultimately graduate. Unless other factors are present, students who do not meet the prescribed conditions are required to transfer out of their declared major. An appeal of this decision is directed to the associate dean of undergraduate student services, College of Education, Health and Human Services, 304 White Hall.

Background Checks for Teacher Licensure Candidates

For field experience, student teaching and any culminating internship in teacher education that requires candidates to be placed within a school or agency ("school/agency") setting, the college requires candidates to complete Bureau of Criminal Investigation and Identification (BCII) and Federal Bureau of Investigation (FBI) background checks and submit the results to authorized personnel at their assigned school/agency before the beginning of the field experience or the first day of the semester in which the student teaching/internship will take place. Authorized school/agency personnel will determine whether a candidate may participate in fieldwork in that setting. The BCII and FBI background checks are good for one year and are mandatory for licensure application. Electronic fingerprinting is available for BCII and FBI in 221 White Hall and should be completed at least two months prior to field experience/student teaching/culminating internship. Regional campus students should contact their Regional Campus coordinator to identify fingerprinting availability at each campus. Candidates are responsible for fees incurred for this requirement. For more information on this policy, contact the Director of Clinical Field Experience in 304 White Hall. Visit the Ohio Department of Education (ODE) website at www.ode.state.oh.us for more information about background check requirements for educators in Ohio. Contact the Office of Professional Conduct at the ODE for specific information about the results of the background check.

Student Teaching

The application for student teaching is completed online through the College of Education, Health and Human Services' student portal. Students will be required to complete the application during specified windows posted on the Vacca Office of Student Services' (VOSS) website. Application windows will typically be accessible during the months of October and November in the fall semester and March and April in the spring semester. Failure to complete the application and submit the prerequisite training documents within the designated time frame may delay the student teaching placement. Depending on the program area, students will apply either 2 or 3 semesters prior to their anticipated student teaching semester. Students should meet with their academic advisor for details on which semester to apply.

Once the application is submitted, VOSS staff (or appropriate regional campus staff) will determine eligibility by reviewing coursework, GPA, disposition assessments, and other program area requirements. Specifically, staff will review the following:

- Coursework – aside from student teaching and inquiry seminar, all coursework in the program of study must be completed with the minimum grade required in each course (i.e., a 'C' or higher in a course where the program requirements prescribe a minimum grade of C).

- GPA – confirmation that the applicant has a 2.75 cumulative GPA or higher and meets the minimum major GPA required for their program as listed in the university catalog.
- Disposition Assessments – no outstanding Professional Disposition Plans (PDPs) are permitted. An applicant with an outstanding PDP must have it cleared before beginning student teaching.
- Program Area Requirements – applicant must have completed all program requirements for their major that are outlined and specified in the university catalog.

Students should meet with their faculty and/or academic advisor in VOSS for any clarifications. Written notification of eligibility will be emailed to each applicant.

Those eligible for student teaching are required to attend a mandatory meeting where additional information about student teaching is provided. Failure to attend this meeting may result in a delay of student teaching. Placement forms, distributed at this meeting, need to be completed by the deadline.

The Clinical Experience Office will make the final decision about the placement site for the Kent Campus. Placement decisions at the Regional Campuses are made by the designated placement officer at each campus. Candidates are not to contact schools or potential mentors directly to make their own arrangements. Placements are generally made within a 50 mile radius of Kent State University. Student teaching is a full-time commitment and candidates are expected to follow the schedule of the cooperating teacher.

Education Licensure Application

Students in the teacher education programs must apply for State of Ohio Licensure within 12 months of program completion (defined by completion of all licensure program requirements). After 12 months, applicants must meet State approved program/licensure requirements that are in effect at the time of application. This means that students who apply after the 12 month deadline may have to take additional coursework if the content, methods courses, program requirements, or licensure requirements have changed from the catalog in force.

If a student does not apply for their license within 6 years, they are subject to any additional state licensure requirements and are also subject to additional coursework based on changes in areas such as content, age of coursework and changes in program requirements. A minimum of 9 credit hours will be required to apply for licensure after 6 years of program completion.

Admission GPA for Undergraduate Students

For admissions, the College of Education, Health and Human Services considers a student to have established a Kent State University GPA after the student has successfully completed a minimum of 12 Kent State University credit hours. Undergraduate students who have not completed a minimum of 12 Kent State University credit hours will be evaluated for admission into programs, Advanced Study, and the Professional phase based on their high school GPA for new freshmen, or transfer GPA for transfer students. Once a student has successfully completed a minimum of 12 Kent State University credit hours, only the student's Kent State cumulative GPA will be considered for admission into a program, Advanced Study, and Professional Phase.

Students who have completed 12 or more credit hours of previous college-level coursework, either at Kent State University or at another accredited institution, need an overall GPA of 2.00 or higher to declare a College of Education, Health and Human Services majors, minors or certificates unless a higher minimum GPA is specified by the program. See specific programs in this catalog for more information on required minimum GPA to declare. Non-degree EHHS General can be declared without a minimum 2.00 overall GPA.

Transfer applicants who have completed fewer than 12 semester hours of college-level coursework will be evaluated on both collegiate and high school records.

Undergraduate Graduation Requirements

- Students declared in a teacher licensure major or minor must earn a minimum C grade in all major/minor and professional coursework.
- Students declared in the Education minor must earn minimum 2.500 content GPA.
- Students may apply a maximum 4 credit hours of Physical Activity, Wellness and Sport (PWS) courses toward their degree.
- Students may apply a maximum of 4 credit hours of variable-titled workshop (xxx93) toward an undergraduate degree. Some program areas may be more restrictive. Students are advised to consult their program regarding application of workshop credit toward degree requirements.

To see graduation requirements for a specific program, please select a major from the undergraduate program listing.

Requirements for Admission to Advanced Study

Admission to advanced study is required of all teacher education initial licensure majors and minors prior to enrolling in upper-division education courses. Upon completion of coursework as determined by program area, students should have satisfied the prerequisites for admission to advanced study. Students must submit an application for advanced study by the second Friday of the term during which all prerequisites for advanced study will be completed, and at least one semester prior to beginning any coursework for which "Admission to Advanced Study" is a prerequisite. All students apply for Advanced Study through the College of Education, Health and Human Services Student Portal which can be accessed through the Vacca Office of Student Services web page. Students in teacher education majors and minors must be officially admitted to advanced study to take upper-division professional coursework.

Please note: Admission to advanced study is required for students pursuing an undergraduate major that leads to initial teacher licensure, with the exception of Trade and Industrial Education majors who obtained initial licensure through the Alternative Resident Educator Licensure Program (teachers recruited from business and industry).

Requirements for Admission to Advanced Study

To manage enrollment and deliver high-quality programs, the faculty will select the most qualified applicants for admission based upon evaluation of academic success (cumulative GPA) at Kent State University, non-academic criteria and other specific program criteria.

Please be aware that reapplication may be necessary if postponing advanced study coursework or if withdrawn for one year or more.
